Case Studies In Non Directive Play Therapy Virginia Ryan

Case Studies in Non-directive Play Therapy: Virginia Ryan 1996 This volume presents seven case-studies of non-directive play therapy with children and adolescents. The chapters focus on particular aspects of the process of play therapy, with scope also for discussing complex theoretical issues.

Play Therapy: Kate Wilson 2005 This highly readable book provides a comprehensive theoretical and practical guide to non-directive play therapy, which is an effective and ethically sound method of helping troubled children and adolescents with their emotional difficulties. It draws extensively on case material to guide practitioners through the intricacies of establishing and practising this therapeutic approach. Principles and background to the development of non-directive play therapy as a therapeutic method An updated theoretical framework for this approach, including symbolic play and its role in therapy Essential assessment, planning and practice issues and skills Working with children and their families systematically Play therapy in statutory settings Presenting therapeutic material in court proceedings This second edition has been thoroughly revised and updated to incorporate recent theory, research and practice developments. New issues addressed include: additional considerations when working with children in statutory settings, the integration of attachment theory within the book's Piagetian framework, using drawing, structured exercises and role play within a non-directive approach, and working with a wide variety of children's and adolescents' concerns.

Leadership Education and Training (LET) 2- 2001

Play as Therapy: Karen Stagnitti 2009 While paediatric healthcare professionals view play as the treatment tool of choice for children under school age, the theory and practice underpinning play-based therapeutic approaches often remain less clear to individual practitioners. Paediatric intervention approaches are increasingly being questioned, and individual practitioners constantly asked to provide evidence-based practice. In response, a more coherent understanding and fresh discussion on children's play and utilisation of play for therapeutic purposes is needed, especially as societal expectations and lifestyles change. Play as Therapy provides background theory and practical applications of original research on play assessment and interventions used in therapy. The book offers a solid foundation for identifying and assessing play dysfunction, understanding play in different cultural contexts and considerations when intervening with play. The practical approach is underpinned by theory, research and case vignettes to explain how to utilise play as therapy with challenging children.

The Handbook of Play Therapy and Therapeutic Play: Linnet McMahon 2012-12-06 This completely revised and updated second edition provides a comprehensive introduction to using play to communicate with troubled or traumatized children and their families, and to heal emotional damage. The book gives examples of good practice in different settings and situations. Drawing on psychodynamic, systemic and attachment theory, the book provides an integrated theory base for using play in therapeutic work with children. It emphasizes non-directive approaches to therapeutic play and play therapy, based on supporting the child’s developing self within the safe boundaries provided by the setting and the worker’s emotional holding and containment. Areas explored include: children with disabilities and illnesses daily living with abused and traumatized children helping troubled families difficulties in early years children experiencing separation, loss and bereavement children moving to new families. The Handbook of Play Therapy and Therapeutic Play is an invaluable resource for all of those using play therapy with children and will appeal not only to play therapists but also to professionals working in the broader field of therapeutic play. It will be useful whether the readers are at the beginning of their training or are well-established and experienced practitioners and managers.

Play Therapy Interventions with Children's Problems: Garry L. Landreth 2010-08-14 This is an easy-to-use reference to the most effective play therapy techniques and their substantiated results. Play therapy is not an approach based on guess, trial and error, or whims of the therapist at the moment. It is a well-thought-out, philosophically conceived, developmentally based, and research-supported method of helping children cope with and overcome the problems they experience in the process of living their lives. Concise digests of play therapy procedures explore the most difficult, as well as the most common problems encountered by play therapists. These digests cover play therapy approaches based on a variety of theoretical positions for dealing with a broad range of specific problems. Because they often do not have access to substantiated results, play therapists sometimes doubt themselves and the effectiveness of their work. This book, an invaluable resource, puts an end to such questioning.
Routledge Encyclopedia of Translation Studies - Mona Baker 2019-09-20 The Routledge Encyclopedia of Translation Studies remains the most authoritative reference work for students and scholars interested in engaging with the phenomenon of translation in all its modes and in relation to a wide range of theoretical and methodological traditions. Play Therapy for Very Young Children - Charles E. Schaefer 2008-08-15 Research has shown that a child’s social and academic success can be greatly influenced by experiences from infancy and toddlerhood. Despite this knowledge, the importance of infant mental health has only recently been recognized. This book is one of the first to present the major models of play interventions with very young children and their families. In this collection of essays by child development experts, the editors provide a comprehensive guide of the most beneficial effects of play therapy and play for the very young. Regardless of the theoretical orientation of the play therapist, this book will help the clinician to conceptualize the worlds of infants and toddlers, and explain the specific play therapy interventions that can be effectively utilized. Contributors address specific therapies from cultures around the world, including caregiver-toddler play therapy, filial play therapy, mother-infant play, and play based interventions with young children with disabilities and autism. This book is essential for students and professionals who work with very young children.

Developing Reflective Practice - Martyn, Helen 2000 This text employs a 'bottom-up' approach to learning. Examples of social work practice with children and families are presented, providing real-life illustrations of the dilemmas and challenges facing practitioners.

The Presence of the Therapist - Monica Lanyado 2004 The Presence of the Therapist explores the many dilemmas and difficulties of how to work with a person who has become highly defensive or fearful of having thoughts about what has happened to them.

Case Studies in Child and Adolescent Mental Health - M. S. Thambirajah 2007 A unique source of material suitable for all practitioners, this title provides detailed descriptions of common cases seen in specialist CAMHS including depression, learning disabilities, Asperger’s syndrome and anorexia.

The Case Study Companion - Scott Andrews 2021-05-26 The Case Study method of teaching and learning, adopted by business schools and management centres globally, provides an important function in management education, but employing it effectively can often be a challenge. This book provides practical insights, tools and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based, participant-centred learning environments, exploring good practices for case teaching and learning. It provides guidance for case writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment, supporting students’ own development of cases to showcase good practice in organisations. The final section of this book showcases some of the resources available, providing links and reviews of additional material that can support future case teaching and writing practice, including publication. The Case Study Companion is designed for lecturers using cases within their teaching across all management disciplines, as well as those training for Professional Development and Management Education qualifications. It will also be useful for postgraduate, MBA and Executive Education students wanting to make the most of case studies in their learning and assessments.

Introduction to Play Therapy - Ann Cattanach 2003 This title provides a basic grounding in play therapy intervention, answering

A Case Study of an Emotionally Disturbed Boy Using the Non-directive Approach to Art Therapy-Nan Graber 1973

Group Filial Therapy-Louise Guerney 2013-04-28 In Group Filial Therapy (GFT), therapists train parents to conduct play sessions with their own children to help meet children's therapeutic needs, and to transfer appropriate skills to family life. Based on parents' application of Child-Centred Play Therapy, taught and supervised by filial therapists, this evidence-based method is highly effective for working with families from diverse backgrounds and locations. This book provides an accessible guide to the theory and practice of GFT, and for the first time offers step-by-step guidelines for implementing the GFT program developed by Dr Guerney, the co-creator of Filial Therapy. Important practical considerations are addressed by Dr Guerney and Dr Ryan, such as how to determine the composition of groups and the duration of programs, and how to conduct Filial Therapy intakes. The facilitative attitudes and skills needed to be an effective Filial Therapy group leader are also described, and comprehensive instructions for implementing Dr Guerney's 20-week model of GFT are provided. The book closes with examples of how the program may be adapted to meet the needs of special groups. Replete with examples and dialogues bringing to life the group process, this definitive guide will enable therapists already familiar with the method, as well as those wishing to learn it, to maximise the fulfilment of therapeutic goals for participating families. Practitioners in mental health, social services and counselling, as well as parenting experts, play and filial therapists and therapists in training will find that this book expands and enriches the services they can offer their clients.

Transition Leadership-Catherine Hayes 2020-05-15 Integrating practitioner research with Buddhist philosophy, business and clinical psychology, this book provides a new perspective on leading change in organisations, supporting leaders and change professionals with insight into useful practices for today's business environment. It identifies the unseen and overlooked complexities of the transition space, helping leaders to recognize patterns in their own leadership practices. This volume includes approaches for working at the intersection of complexity and ambiguity, and discusses how different mindsets impact behavior and outcomes which may get in the way of change agendas. It focuses on approaches for navigating the challenges of organisational transitions, while developing sustainable transition capabilities and practices. A comprehensive new framework for understanding and shaping business management, Transition Leadership is a valuable resource for students and researchers of business practices, work psychology, and transition and change, as well as current and future business and organizational leaders.

Infant Play Therapy-Janet A. Courtney 2020-03-12 Infant Play Therapy is a groundbreaking resource for practitioners interested in the varied play therapy theories, models, and programs available for the unique developmental needs of infants and children under the age of three. The impressive list of expert contributors in the fields of play therapy and infant mental health cover a wide range of early intervention play-based models and topics. Chapters explore areas including: neurobiology, developmental trauma, parent-infant attachment relationships, neurosensory play, affective touch, grief and loss, perinatal depression, adoption, autism, domestic violence, sociocultural factors, and more. Chapter case studies highlight leading approaches and offer techniques to provide a comprehensive understanding of both play therapy and the ways we understand and recognize the therapeutic role of play with infants. In these pages professionals and students alike will find valuable clinical resources to bring healing to family systems with young children.

Dramatherapy and Family Therapy in Education-Penny McFarlane 2012 A collaborative therapeutic approach is often the best way to assess and meet the needs of troubled children. Focusing on Multi Agency Support Teams in educational settings, this book describes how specialist therapists and other professionals can successfully work together to become essential interlocking pieces of the jigsaw of emotional support.

The Psychology of Bulimia Nervosa-Myra Cooper 2003 Bulimia Nervosa is an eating disorder characterised by recurrent episodes of binge-eating followed by inappropriate compensatory behaviour. It affects 1-2% of the population, the majority of cases occurring in women between the ages of 16 and 35. This book provides a comprehensive and detailed review of the key psychological aspects of the disorder and places particular emphasis on cognitive considerations. The coverage includes the key features of Bulimia Nervosa, associated problems, psychological theories and different treatment approaches. There is special focus on cognitive factors with case examples used to illustrate the two most articulated cognitive treatments for the disorder. Emerging topics, such as imagery and metacognition are covered, as are service issues, such as stepped care and practice guidelines. Drawing on research and theory from cognitive and non-clinical areas of psychology, The Psychology of Bulimia Nervosa provides an original and challenging perspective on this debilitating condition. It questions assumptions about cognitive theory of Bulimia Nervosa and the role of standard cognitive therapy in treating the problem, suggests novel ideas, and a revised treatment and outlines areas for further research activity.

From the Classroom to the Corner-Cynthia Cole Robinson 2007 From the Classroom to the Corner explores the in-school and out-of-school experiences of three young women who dropped out of school as adolescents and turned to prostitution. This fascinating book presents them as case studies in the context of dropping out, in-school and non-school curriculum, adolescent prostitution, feminist theory, and race, class, and gender. Most prostitutes state that they are on the streets because they lack the educational credentials and job training required for gainful employment; therefore, the educational experiences of these young women are tantamount to any attempt to retain girls on the fringes. This book gives insight into how the educational system and classroom experience fail to meet the needs of these marginalized young women, and offers curricular designs to address the educational needs of dropouts and potential dropouts. The effects of the non-school curriculum on these girls' academic experience are also explored.

Rhythms of Relating in Children's Therapies-Stuart Daniel 2017-02-21 This multidisciplinary book shows how to foster meaningful relationships between therapists and vulnerable children, through exploring the concept of communicative musicality and creating rhythms of connection. It includes broad and in-depth contributions from leading therapists from diverse backgrounds - including Peter A. Levine, Daniel Hughes, Stephen Forges, Dennis McCarthy and many more. Contributors reflect on their own experiences, providing insights from the fields of music therapy, trauma, dance and movement therapy, psychobiology, dramatherapy, counselling, play therapy, and education. Contemporary theory is woven in with case stories to highlight the emotional realities of working with highly vulnerable children, and to present proven examples of how therapists can improve the quality of connectedness. Full of original and innovative ideas for working with attachment issues, trauma, communication difficulties, autism, learning disabilities, aggression and anxiety, this is inspiring reading for professionals who work with vulnerable children in creative therapies. Royally proceeds from the book will be donated to the National Society for the Prevention of Cruelty to Children (NSPCC), UK.

Social Research Methods-Alan Bryman 2012-01-19 Text accompanied by a companion web site.

Research Methods in Education-Louis Cohen 2002-09-11 This is a new edition of one of our best-selling textbooks. The authors have thoroughly updated the fourth edition and included more text on current developments in research practice, action research, developments in ICT, questionnaire design, ethnographic research, conducting needs analysis, constructing and using tests, observational methods, reliability and validity, ethical issues and curriculum research. The entire text has been redesigned to cater for the increasingly sophisticated needs of the educational researcher. The new edition is more comprehensive, up-to-date and user-friendly, with increased accessibility. The authors, who are experienced teachers in the field, have produced a better written book (if that's possible) containing readable and realistic views of research and methodology, and show how to interpret the data.

International Encyclopedia of Adult Education-L. English 2016-04-30 The Encyclopedia of Adult Education is the first comprehensive reference work in this important and fast-growing field, and is an invaluable resource for adult educators who research and teach in the fields of higher education, work in community-based settings, or practise in public or private organizations. Its 170+ articles, written by an international team of contributors from over 17 countries, detail the research and practice of the field from its emergence as a separate discipline to the present day, covering key concepts, issues and individuals and providing a cutting-edge summary of ongoing debates across a wide range of perspectives, from self-directed learning to human resource development. Entries are arranged A-Z and extensive cross-referenced, with detailed bibliographies for each topic to facilitate further research.
Virtual Coach, Virtual Mentor—David Clutterbuck 2010-10-01 In the case of virtual coaching and mentoring (or e-mentoring and ecoaching; or coaching/mentoring by wire—choose your own preferred nomenclature!) there are hundreds, perhaps thousands of programs and initiatives across the world. Yet there is comparatively little in the way of comparison of good practice or academic evaluation of what does and doesn’t work. We found numerous individual case studies but a dearth of empirical research and no significant collection of cases to illustrate the diversity of applications. Virtual Coach, Virtual Mentor provides a wide variety of perspectives on a rapidly growing phenomenon. We hope and intend that it should make a timely and significant contribution to good practice and to encouraging more practitioners and their clients and more organizations to experiment with using electronic media to enrich coaching and mentoring. The view of ecoaching and e-mentoring is firmly one that these new media are less a replacement for traditional face-to-face than an enhancement of learning alliances in general. We see no evidence of fewer face-to-face coaching or mentoring relationships—on the contrary, they continue to become more popular and widespread. Rather, we see that virtual coaching and mentoring both enrich predominantly face-to-face relationships, by connecting partners at times between formal meetings, and open up coaching and mentoring to new audiences and new applications.

Case Studies in System of Systems, Enterprise Systems, and Complex Systems Engineering—Alex Gorod 2014-07-01 Suitable as a reference for industry practitioners and as a textbook for classroom use, Case Studies in System of Systems, Enterprise Systems, and Complex Systems Engineering provides a clear understanding of the principles and practice of system of systems engineering (SoSE), enterprise systems engineering (ESE), and complex systems engineering (CSE). Multiple domain practitioners present and analyze case studies from a range of applications that demonstrate underlying principles and best practices of transdisciplinary systems engineering. A number of the case studies focus on addressing real human needs. Diverse approaches such as use of soft systems skills are illustrated, and other helpful techniques are also provided. The case studies describe, examine, analyze, and assess applications across a range of domains, including: Engineering management and systems engineering education Information technology business transformation and infrastructure engineering Cooperative framework for and cost management in the construction industry Supply chain modeling and decision analysis in distribution centers and logistics International development assistance in a foreign culture of education Value analysis in generating electrical energy through wind power Systemic risk and reliability assessment in banking Assessing emergencies and reducing errors in hospitals and health care systems Information fusion and operational resilience in disaster response systems Strategy and investment for capability developments in defense acquisition Layered, flexible, and decentralized enterprise architectures in military systems Enterprise transformation of the air traffic management and transport network Supplying you with a better understanding of SoSE, ESE, and CSE concepts and principles, the book highlights best practices and lessons learned as benchmarks that are applicable to other cases. If adopted correctly, the approaches outlined can facilitate significant progress in human affairs. The study of complex systems is still in its infancy, and it is likely to evolve for decades to come. While this book does not provide all the answers, it does establish a platform, through which analysis and knowledge application can take place and conclusions can be made in order to educate the next generation of systems engineers.

Case Study Designs in Music Therapy—David Aldridge 2005 This book shows, for the first time, how research and clinical work can creatively complement one another, proving beneficial to both disciplines. Each chapter is written by a leading researcher and practitioner in the field, and the book covers a wide spectrum of approaches within different settings.

Introducing Research and Data in Psychology—Ann Searle 2020-11-25 Introducing Research and Data in Psychology shows how research design and data analysis are attainable and useful skills. It introduces both experimental and non-experimental methods of research and the analysis of data using both descriptive and inferential statistics. The uses, interpretation and calculation of common two sample statistical tests are explained. This comprehensive textbook includes the following designed features to help with technique: Practice exam answers to show how to achieve a higher grade Chapter summaries Glossary Case studies and examples Exercises and a full bibliography.

Drawing on Difference—Mair Rees 2003-09-02 This book reveals how art therapy can support and validate the emotional and mental health needs of people with learning difficulties. Case studies present work with adults and children with differing degrees of difficulty such as personality disorder, autism or severe learning difficulties and discuss the needs of people with learning difficulties who have experienced traumas such as rape or bereavement. Particular emphasis is placed on service evaluation and standards and on the client's personal experience. Contributors discuss practical, professional and political issues such as: * the practical challenges of providing an art therapy service within and beyond the hospital setting * the similarities and differences between art therapy and other allied professions such as music and dramatherapy * clinical effectiveness and clinical supervision Drawing on Difference brings together for the first time discussion from leading professionals in this increasingly popular area of specialisation within psychotherapy.

Research Anthology on Rehabilitation Practices and Therapy—Management Association, Information Resources 2020-08-21 The availability of practical applications, techniques, and case studies by international therapists is limited despite expansions to the fields of clinical psychology, rehabilitation, and counseling. As dialogues surrounding mental health grow, it is important to maintain therapeutic modalities that ensure the highest level of patient-centered rehabilitation and care are met across global networks. Research Anthology on Rehabilitation Practices and Therapy is a vital reference source that examines the latest scholarly material on trends and techniques in counseling and therapy and provides innovative insights into contemporary and future issues within the field. Highlighting a range of topics such as psychotherapy, anger management, and psychodynamics, this multi-volume book is ideally designed for mental health professionals, counselors, therapists, clinical psychologists, sociologists, social workers, researchers, students, and social science
Emerging Trends in the Diagnosis and Intervention of Neurodevelopmental Disorders

Neurodevelopmental disorders encompass a group of conditions that can typically manifest during early childhood. These include intellectual disabilities, communication disorders, autism spectrum disorder (ASD), attention-deficit/hyperactivity disorder (ADHD), specific learning disorder (SLD), and motor disorders. Early identification and assessment can be a valuable tool in determining diagnosis, prognosis, functional abilities, and formulating clinical intervention for both children and adults with neurodevelopmental disorders. Emerging Trends in the Diagnosis and Intervention of Neurodevelopmental Disorders is an essential reference source that discusses and disseminates contributions covering recent trends in diagnosis, assessment, and intervention techniques. Featuring research on topics such as clinical linguistics, neural connectivity, and animal-assisted therapy, this book is ideally designed for speech pathologists, social workers, occupational therapists, psychologists, psychiatrists, neurologists, pediatricians, researchers, clinicians, and academicians seeking coverage on neural and developmental disorder identification and strategies for clinician support and therapies.
