The picture of China that emerges is at turns unsettling, awe-inspiring, and heart-breaking. Chongnae deftly portrays a giant awakening to its own raw, volatile, and often uncontrollable power. Translators Bruce Fulton and Toji Park Kyung-Ni address the social, cultural, political, economic and social security aspects of Japan's demographic change.

The second edition has been extensively revised to include the most up-to-date methods of researching this relationship. Included are new chapters on qualitative and sociological measures, research methods in nutritional epidemiology. Since publication of the 1st edition, we now have a much better understanding of the characteristics of nutritional exposure that need to be measured in order to answer questions about diet-disease relationships. The result is a clear and useful guide to some of the most complex and critical issues in contemporary translation studies.

The first and second chapters cover the geography, climate and vegetation of Kyrgyzstan and Uzbekistan, respectively. The third chapter provides a brief history of medicinal plant use and science in Central Asia. A majority of the plants described grow wild in Central Asia, with some being endemic, while other species have been introduced to Central Asia but are commonly used in regional plant-based medicine. The book contains four introductory chapters. The first and second chapters cover the geography, climate and vegetation of Kyrgyzstan and Uzbekistan, respectively. The third chapter provides a brief history of medicinal plant use and science in Central Asia. The fourth chapter contains general information about phytochemistry. The fifth chapter comprises the bulk of the book and covers 208 medicinal plant species. Nearly all species have one or more high-quality, color photographs. Three useful appendices have been included: the first is a glossary of botanical and ecological terms, the second is a glossary of chemistry terms, and the third is a glossary of medical terms. During the preparation of this manuscript we found there to be a deficiency in quality reference resources for the translation of many of the technical terms associated with the different branches of science covered in this book. In order to make our task easier we compiled glossaries over the course of preparing the manuscript and have included them feeling that they will be an extremely valuable resource for readers.

Instructions for Practical Living, and Other Neo-Confucian Writings

Managing Next Generation Networks and Services

Method in Translation History

Anthony Pym 2014-04-08 Starting from the critical notion that we should be asking questions of contemporary importance - and that 'importance' itself must be defined - Anthony Pym sets about unpacking many of the currently dominant modes of translation history, proposing, among much else, that the objects of this history should be translators as people, that researches are subjectively involved in their object, that cultural systems are based on social will, that translation work is intercultural space, and that a model of co-existence through mediation may be applied to the way translation (and research) work between cultures. At the same time, the proposed methodology is eminently constructive, showing how many empirical techniques can be developed and applied. Clear illustrations are given of corpus selection, working definitions, descriptive statistics, and the construction of networks and regimes, incorporating elaborate examples drawn from medieval and modernist fields, as well as finding space for notes on practical problems like funding research. Finding its focus in historical debates, this book cannot help but create contemporary debate: its arguments seek not only to revitalize the historical study of translation but also to develop the wider concerns of intercultural studies.

Instructions for Practical Living, and Other Neo-Confucian Writings

A World to Win

Jack Conroy 2000 “Written in the full heat of the Great Depression, Jack Conroy’s A World to Win bears the marks of the labor struggles and union strikes he witnessed in the early 1930s. Like Dickens, Conroy evokes compassion and warmth for his absurd, comic, tragic characters through caricature, using parody to extract humor from their gray, circumscribed lives. Set in St. Louis, the narrative centers on Leo and Robert Hurley, two half brothers who are divided by education and aspirations. Leo is an unlikely proletarian hero who finally gains political consciousness in spite of himself. Robert has literary pretensions (but little talent) and a head clogged with scraps of genteel romance and Victorian poetry. As Leo and Robert move toward reconciliation, they come into contact with hybrids of artistic milieus, radical politics, and labor activism that were particular to the Popular Front era. The introduction by Douglas Wixson shows how Conroy’s writing is embedded in his experiences and also how his flawless ear for language shapes both form and character in the novel. Moving readers from a sentimentalized concern for the poor to a more concrete contemplation of the social and political conditions that characterize their lives, A World to Win serves as a reminder of the continuing importance of a dedication, like Conroy’s, to giving voice to the voiceless.”

A World to Win

Kyung-ni Pak 2011-01-18 Originally published in three parts comprising 21 volumes, Pak Kyung-ni’s T’oji (T’o’i) is widely regarded as a masterpiece of Korean literature and has achieved unprecedented popularity in Korea. The epic follows the fortunes and misfortunes of several generations of villagers of a traditional farming community, and at the same time chronicles Korea’s turbulent history from 1897 to 1945.
