Approaches to Class Analysis Erik Olin Wright 2005-07-01 Few themes have been as central to sociology as 'class' and yet class remains a perpetually contested idea. Sociologists disagree not only on how best to define the concept of class but on its general role in social theory and indeed on its continued relevance to the sociological analysis of contemporary society. Some people believe that classes have largely dissolved in contemporary societies; others believe class remains one of the fundamental forms of social inequality and social power. Some see class as a narrow economic phenomenon whilst others adopt an expansive conception that incorporates cultural dimensions as well as economic conditions. This 2005 book explores the theoretical foundations of six major perspectives of class with each chapter written by an expert in the field. It concludes with a conceptual map of these alternative approaches by posing the question: 'If class is the answer, what is the question?'

Social Problems in a Diverse Society Diana Elizabeth Kendall 2004 "Social Problems in a Diverse Society" focuses on the significance of race, class, and gender; uses personal narratives to convey how problems are experienced by individuals and groups; and applies sociological perspectives throughout to examine social issues. The text includes five chapters on problems based on inequalities: wealth and poverty, race and ethnicity, gender, age, and sexual orientation. In the third edition, Diana Kendall, who specializes in social theory, continues to blend contemporary feminist and humanist perspectives with the three main sociological perspectives. The third edition also includes new boxes entitled "Social Problems and Statistics," which look at how statistics are used (or misused) to inform the public about social problems. Additionally, Kendall has added important new coverage of terrorism and national security, and white collar crime.

Honky Dalton Conley 2001 A coming-of-age memoir of a white boy growing up in predominantly African-American and Latino housing projects on New York’s Lower East Side reveals how race and class were pivotal factors in his life. Reprint. 50,000 first printing.

Population and Society Dudley L. Poston, Jr 2016-12-28 This comprehensive yet accessible textbook is an ideal resource for undergraduate and graduate students taking their first course in demography. Clearly explaining technical demographic issues without using extensive mathematics, Population and Society is sociologically oriented, but incorporates a variety of social sciences in its approach, including economics, political science, geography, and history. It highlights the significant impact of decision-making at the individual level - especially regarding fertility, but also mortality and migration - on population change. The text engages students by providing numerous examples of demography’s practical applications in their lives, and demonstrates the extent of its relevance by examining a wide selection of data from the United States, Africa, Asia, and Europe. This thoroughly revised edition includes four new chapters, covering topics such as race and sexuality, and encourages students to consider the broad implications of population growth and change for global challenges such as environmental degradation.

Human Behavior in the Social Environment Anissa Taun Rogers 2016-04-14 This addition to Anissa Rogers’ bestselling Human Behavior in the Social Environment expands the original text with new chapters on spirituality, families and groups, organizations, and communities. Written in the compact, concise manner of the original text, the new chapters cover mezzo and macro contexts, and offer additional material valuable to two- and three-semester HBSE courses.

Hollywood Goes to High School Robert C. Bulman 2015-02-01 What do films such as The Breakfast Club, Dead Poets Society, and Freedom Writers have to teach us about American culture? Social Movements Suzanne Staggenborg 2015-06-01 Social movements around the world have used a wide variety of protest tactics to bring about enormous social changes, influencing cultural arrangements, public opinion, and government policies in the process. This concise yet in-depth primer provides a broad overview of theoretical issues in the study of social movements, illustrating key concepts with a series of case studies. It offers engaging analyses of the protest cycle of the 1960s, the women's movement, the LGBT movement, the environmental movement, right-wing movements, and global social justice movements. Author Suzanne Staggenborg examines these social movements in terms of their strategies and tactics, the organizational challenges they faced, and the roles that the mass media and counter-movements played in determining their successes and failures.

The Googlization of Everything Siva Vaidhyanathan 2012-03-13 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—"To organize the world's information and make it universally accessible"—and its much-quoted motto, "Don't be evil." In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googolization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the "evil" it pledged to avoid.

Making the Social Landscape Susan J. Ferguson 2002 Drawing from a wide selection of classic and contemporary works, this best-selling reader includes 56 readings that represent a plurality of voices and views within sociology. Twenty Lessons in the Sociology of Food and Agriculture Jason Konefal 2018-08-29 Twenty Lessons in the Sociology of Food and Agriculture examines food and agriculture from farm to fork using a sociological lens. Following the “Lessons” format, the book presents twenty sociological lessons on food and agriculture from both established and up-and-coming scholars. Each lesson is written in an accessible and engaging format, incorporates historical and contemporary topics and examples, and discusses hot button issues wherever relevant. The book draws primarily on cases and issues in the United States, but given the global character of food and agriculture, it also incorporates relevant examples from other countries.

Fashionable Nonsense Alan Sokal 2014-01-14 In 1996 physicist Alan Sokal published an essay in Social Text—an influential academic journal of cultural studies—touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in Fashionable Nonsense: Postmodern Intellectuals’ Abuse of Science, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-science, method, and aims of the once-influential French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social constructions.

Ethics for the Information Age Michael Jay Quinn 2006 Widely praised for its balanced treatment of computer ethics, Ethics for the Information Age offers a modern presentation of the moral controversies surrounding information technology. Topics such as privacy and intellectual property are explored through multiple ethical theories, encouraging readers to think critically about these issues and to make their own ethical decisions.

Health, Illness, and Medicine in Canada Juanne Nancarrow Clarke 1990 Class Cultures in Post-Socialist Eastern Europe Dražen Cepić 2018-10-26 This book investigates the extent to which social class has changed in Eastern Europe since the fall of communism. Based on extensive original research, the book discusses how ideas about class are viewed by both working class and middle class people. The book examines how such people’s social identities are shaped by various factors including economic success, culture and friendship networks. The present class situation in Eastern Europe is contrasted to what prevailed in Communist times, when societies were officially classless, but nevertheless had Communist party elites.

Mapping the Social Landscape: Readings in Sociology Susan J Ferguson 2008 Drawing from a wide selection of classic and contemporary works, the 60 selections in this best-selling reader represent a plurality of voices and views within sociology. In addition to classic works by authors such as Karl Marx, Max Weber, C. Wright Mills, David Rosenhan, Kingsley Davis and Wilbert Moore, this anthology presents a wide range of contemporary scholarship, some of which provides new treatments of traditional concepts. By integrating issues of diversity throughout the book,
Ferguson helps students see the inter-relationships of race, social class, and gender, and the ways in which they have shaped the experiences of all people in society.

Focus on Social Problems Mindy Stombler 2020-03-20 "This is an undergraduate level reader for students taking courses in social problems"--

Canadian Families Today David J. Cheal 2007 This exciting collection of original essays by prominent Canadian scholars examines issues and trends affecting family life in Canada. The text is organized in five parts.

The first part, "Conceptualizing the Family," presents an overview of the sociology of the family in Canada: it explores various definitions of "family" from an anthropological perspective; examines family patterns in historical and cross-cultural contexts; provides an overview of the theoretical frameworks and research methodologies for family studies. In this section, Canadian authors discuss how the concept of the family as a social institution is the focus of the second part of this book. In Chapter 3, Rachel Ariss shows how social expectations and ideologies about intimacy shape how individuals experience family formation. In "Parents and Children," Gillian Ranson introduces the dominant ideals of motherhood and fatherhood in Canada and demonstrates the extent to which parenting practices are shaped by social and economic contexts. Major changes in social practice and in the legal environment that have gone hand in hand with demographic changes to contribute to the episodic nature of spousal unions in Canada today. In Chapter 5, Craig McKie outlines the legal history of the family in Canada and explores how the introduction of Islamic laws (shariah) challenge the principles that underlie Canadian arrangements to homophobia in their beliefs and practices when these are not in fundamental conflict with Canadian law.

Chapter 6 provides a timely examination of the issues that affect the "sandwich generation": coreidence with adult children, the "informalization" of care to aging parents, intergenerational ambivalence, and the relationship between midlife and families and social policy. As Lori D. Campbell and Michael P. Carroll note in their chapter on older Canadians, aging within a family context has become more complex and diverse than ever before. The changes that have been occurring in the form and structure of families as a result of greater longevity, increased divorce, remarriage, and othersocio-demographic factors, allow increased "intergenerational exchange" - the exchange of support between older and younger generations. Part III highlights the economic inequalities that exist among families. As Andrea Doucet notes, historical circumstances have contributed to strong divisions in both paid and unpaid work that are linked to gender, class, and ethnicity. Chapter 8 examines key issues in the study of paid and unpaid work, including: the connections that exist between paid and unpaid work; how unpaid work benefits the state; the complexities involved in measuring unpaid work; the costs of care; and why gender differences in paid and unpaid work matter. In the following chapter, Joseph H. Michalski argues that family change and demographic events have had their impact on income poverty, to the extent that they influence the types of families and living arrangements in which Canadians share and pool income. Diversity is the unifying theme of Part IV. In her article, In "'I Do'. Belong in Canada: Same Sex Relationships and Marriage," Doreen M. Fumia reveals the insecure relationship between sexual minorities and citizenship, highlighting differences in social structure and organization; and risk factors that affect Aboriginal, immigrant, and invisible minority youth. In Chapter 12, Michelle K. Owen draws our attention to the impact that disability has on Canadian families: the role that gender plays in the lives of people with disabilities; the relationship between poverty and disability; and the increased incidence of physical and sexual abuse among people with a disability. The final part of the book is devoted to law and policy. In "All in the Family: Violence Against Women, Children, and the Aged," Aysen Sev' er examines the "dark side of the family," where power differences can translate into mental, physical and/or sexual abuse, and even murder. She reviews the basic definitions of abuse and introduces theories that explain violence within intimate relationships. She then addresses possible interventions at the social and structural levels that may diminish the incidence of abuse. The role of the state in regulating family life is addressed in Chapter 14. Catherine Krull details the evolution of Canada's family policies within a liberal welfare state and examines the ideology and implications of a universal versus a targeted approach to family policies. Krull argues that we need to appreciate why state intervention is necessary if we are to achieve gender equity and suggests that Quebec's progressive family policies should serve as a model for the rest of Canada. In the final chapter, Margrit Eichler takes a lighthearted look at the predictions that experts made regarding the future of the family from 1975 to 1990. She wants to ask: Why do we expect the future to be different? Who are the experts anyway? In her review of other that were surprisingly accurate, Eichler bravely makes her own predictions regarding the future of the family: she anticipates a modest trend towards three generation families as one response to economic uncertainties and political turmoil; adequate in life expectancy; continuing low fertility with high immigration from third world countries; less homophobia; a continuing slow erosion of strictly defined gender roles; and a continuing diversity of unions, including common law and legal marriages, opposite and same sex marriages. In short, families will continue to exist, some will prosper, others less so, and children will continue to be raised within family settings, which will probably be even more diverse than at present.

Blueprint Robert Plomin 2018-11-20 A top behavioral geneticist makes the case that DNA inherited from our parents at the moment of conception can predict our psychological strengths and weaknesses. In Blueprint, behavioral geneticist Robert Plomin describes how the DNA revolution has made DNA personal by giving us the power to predict our psychological strengths and weaknesses from birth. A century of genetic research shows that DNA differences inherited from our parents are the consistent life-long sources of our psychological individuality—the blueprint that makes us who we are. This, says Plomin, is a game changer. Plomin has been working on these issues for almost fifty years, conducting longitudinal studies of twins and adoptees. He reports that genetics explains more of the psychological differences among people than all other factors combined. Genetics accounts for fifty percent of psychological differences—not just mental health and school achievement but all psychological traits, from personality to intellectual abilities. Nature, not nurture is what makes us who we are. Plomin explores the implications of this, drawing some provocative conclusions—among them that parenting styles don't really affect children's outcomes once genetics is taken into effect. Neither tiger mothers nor attachment parenting affects children's ability to get into Harvard. After describing why DNA matters, Plomin explains what DNA does, offering readers a unique insider's view of the exciting synergies that came from combining genetics and psychology.
