Ethics and Sport in Europe Dominique Bodin 2011-01-01 Defending ethics in sport is vital in order to combat the problems of corruption, violence, drugs, extremism and other forms of discrimination it is currently facing. Sport reflects nothing more and nothing less than the societies in which it takes place. However, if sport is to continue to bring benefits for individuals and societies, it cannot afford to neglect its ethical values or ignore these scourges. The major role of the Council of Europe and the Enlarged Partial Agreement on Sport (EPAS) in addressing the new challenges to sports ethics was confirmed by the 11th Council of Europe Conference of Ministers responsible for Sport, held in Athens on 11 and 12 December 2008. A political impetus was given on 16 June 2010 by the Committee of Ministers, with the adoption of an updated version of the Code of Sports Ethics (Recommendation CM/Rec(2010)9), emphasising the requisite co-ordination between governments and sports organisations. The EPAS prepared the ministerial conference and stepped up its work in an international conference organised with the University of Rennes, which was attended by political leaders, athletes, researchers and officials from the voluntary sector. The key experiences described in the conference and the thoughts that it prompted are described in this publication. All the writers share the concern that the end result should be practical action - particularly in terms of the setting of standards - that falls within the remit of the EPAS and promotes the Council of Europe’s core values.

Transcendental Style in Film Paul Schrader 2018-05-18 With a new introduction, acclaimed director and screenwriter Paul Schrader revisits and updates his contemplation of slow cinema over the past fifty years. Unlike the style of psychological realism, which dominates film, the transcendental style expresses a spiritual state by means of austere camerawork, acting devoid of self-consciousness, and editing that avoids editorial comment. This seminal text analyzes the film style of three great directors—Yasujiro Ozu, Robert Bresson, and Carl Dreyer—and posits a common dramatic language used by these artists from divergent cultures. The new edition updates Schrader’s theoretical framework and extends his theory to the works of Andrei Tarkovsky (Russia), Béla Tarr (Hungary), Theo Angelopoulos (Greece), and Nuri Bilge Ceylan (Turkey), among others. This key work by one of our most searching directors and writers is widely cited and used in film and art classes. With evocative prose and nimble associations, Schrader consistently urges readers and viewers alike to keep exploring the world of the art film.

The New Jew in Film
Nathan Abrams 2012-03-12

Jewish film characters have existed almost as long as the medium itself. But around 1990, films about Jews and their representation in cinema multiplied and took on new forms, marking a significant departure from the past. With a fresh generation of Jewish filmmakers, writers, and actors at work, contemporary cinemas have been depicting a multiplicity of new variants, including tough Jews; brutish Jews; gay and lesbian Jews; Jewish cowboys, skinheads, and superheroes; and even Jews in space. The New Jew in Film is grounded in the study of over three hundred films from Hollywood and beyond. Nathan Abrams explores these new and changing depictions of Jews, Jewishness, and Judaism, providing a wider, more representative picture of this transformation. In this compelling, surprising, and provocative book, chapters explore masculinity, femininity, passivity, agency, and religion in addition to a departure into new territory—including bathrooms and food. Abrams’s concern is to reveal how the representation of the Jew is used to convey confidence or anxieties about Jewish identity and history as well as questions of racial, sexual, and gender politics. In doing so, he provides a welcome overview of important Jewish films produced globally over the past twenty years.

Representative Government
John Stuart Mill 2008

Classic from the year 2008 in the subject Philosophy - Philosophy of the 19th Century, - entries in the bibliography, language: English, abstract: Those who have done me the honour of reading my previous writings will probably receive no strong impression of novelty from the present volume; for the principles are those to which I have been working up during the greater part of my life, and most of the practical suggestions have been anticipated by others or by myself. There is novelty, however, in the fact of bringing them together, and exhibiting them in their connection; and also, I believe, in much that is brought forward in their support. Several of the opinions at all events, if not new, are for the present as little likely to meet with general acceptance as if they were. It seems to me, however, from various indications, and from none more than the recent debates on Reform of Parliament, that both Conservatives and Liberals (if I may continue to call them what they still call themselves) have lost confidence in the political creeds which they nominally profess, while neither side appears to have made any progress in providing itself with a better. Yet such a better doctrine must be possible; not a mere compromise, by splitting the difference between the two, but something wider than either, which, in virtue of its superior comprehensiveness, might be adopted by either Liberal or Conservative without renouncing anything which he really feels to be valuable in his own creed. When so many feel obscurely the want of such a doctrine, and so few even flatter themselves that they have attained it, any one may without presumption offer what his own thoughts, and the best that he knows of those of others, are able to contribute towards its formation.

Divinon stage
Folke Gernert 2021-02-08

Magicians, necromancers and astrologers are assiduous characters in the European golden age theatre. This book deals with dramatic characters who act as physiognomists or palm readers in the fictional world and analyses the fictionalisation of physiognomic lore as a practice of divination in early modern Romance theatre from Pietro Aretino and Giordano Bruno to Lope de Vega, Calderón de la Barca and Thomas Corneille.
Race, Culture, and the Revolt of the Black Athlete Douglas Hartmann 2003

Ever since 1968 a single iconic image of race in American sport has remained indelibly etched on our collective memory: sprinters Tommie Smith and John Carlos accepting medals at the Mexico City Olympics with their black-gloved fists raised and heads bowed. But what inspired their protest? What happened after they stepped down from the podium? And how did their gesture impact racial inequalities? Drawing on extensive archival research and newly gathered oral histories, Douglas Hartmann sets out to answer these questions, reconsidering this pivotal event in the history of American sport. He places Smith and Carlos within the broader context of the civil rights movement and the controversial revolt of the black athlete. Although the movement drew widespread criticism, it also led to fundamental reforms in the organizational structure of American amateur athletics. Moving from historical narrative to cultural analysis, Hartmann explores what we can learn about the complex relations between race and sport in contemporary America from this episode and its aftermath.

Routledge Handbook of Sport and New Media Andrew C Billings 2014-01-10 New media technologies have become a central part of the sports media landscape. Sports fans use new media to watch games, discuss sports transactions, form fan-based communities, and secure minutiae about their favorite players and teams. Never before have fans known so much about athletes, whether that happens via Twitter feeds, fan sites, or blogs, and never before have the lines between producer, consumer, enactor, fan and athlete been more blurred. The Internet has made virtually everything available for sports media consumption; it has also made understanding sports media substantially more complex. The Routledge Handbook of Sport and New Media is the most comprehensive and in-depth study of the impact of new media in sport ever to be published. Adopting a broad, interdisciplinary approach, the book explores new media in sport as a cultural, social, commercial, economic, and technological phenomenon, examining the profound impact of digital technologies on that way that sport is produced, consumed, and understood. There is no aspect of social life or commercial activity in general that is not being radically influenced by the rise of new media forms, and by offering a "state of the field" survey of work in this area, the Routledge Handbook of Sport and New Media is important reading for any advanced student, researcher or practitioner with an interest in sport's studies, media studies or communication studies.

The Past As Future Jürgen Habermas 1994-01-01 Jürgen Habermas is one of the best-known and most influential philosophers in Europe today. Heir to the Frankfurt School, his reputation rests on more than thirty years of groundbreaking works on society knowledge, history, technology, ethics, and many other subjects. He is also a familiar figure in his native Germany where he has often played a prominent role in public debates. In recent years, he has spoken out more directly on the extraordinary changes taking place in Germany, Europe, and the world. This volume of interviews reveals Habermas's passionate engagement with contemporary issues. Wide-ranging and informal, the interviews focus on matters of decisive importance to Germany and the rest of the world in the 1990s: German unification; recent explosive debates about interpretations of German history, Germany's asylum policies, and the Nazi era; efforts to create a cooperative, peaceful Europe; and the significance of the Persian Gulf War. A final interview focuses on the relation between theory and practice: between philosophy and the so-called real world. In an afterword to the volume, Habermas addresses a broad spectrum of issues facing Germany and other nations in this final decade of the century. Ably translated and annotated by Max Pensky, professor of philosophy at the State University of New York at Binghamton, The Past as Future provides a striking portrait of an intellectual who is equally at home in the world of academic philosophy and in mainstream debate and who can make valuable connections between the two.

Humanitarianism in Question Michael Barnett 2012-05-15 Years of tremendous growth in response to complex emergencies have left a mark on the humanitarian sector. Various matters that once seemed settled are now subjects of intense debate. What is humanitarianism? Is it limited to the provision of relief to victims of conflict, or does it include broader objectives such as human rights?
democracy promotion, development, and peacebuilding? For much of the last century, the principles of humanitarianism were guided by neutrality, impartiality, and independence. More recently, some humanitarian organizations have begun to relax these tenets. The recognition that humanitarian action can lead to negative consequences has forced humanitarian organizations to measure their effectiveness, to reflect on their ethical positions, and to consider not only the values that motivate their actions but also the consequences of those actions. In the indispensable Humanitarianism in Question, Michael Barnett and Thomas G. Weiss bring together scholars from a variety of disciplines to address the humanitarian identity crisis, including humanitarianism’s relationship to accountability, great powers, privatization and corporate philanthropy, warlords, and the ethical evaluations that inform life-and-death decision making during and after emergencies.

As such, it should be of value to applicants for commercial uses of transgenic crops, regulators in national authorities as well as the wider scientific community. More information on.

**Boxing, the Gym, and Men** Franck Martin 2017-09-19

This book explores the lived experiences of boxers in a French banlieue, largely populated by people from working-class and immigrant backgrounds. Franck Martin, who joined in the men’s daily workouts for many years, analyzes the act of boxing as a high-stakes confrontation that extends well beyond the walls of the gym. Exploring the physical and existential realities of combat, the author provides a multifaceted “thick description” of this world and shows that the violence faced by the gym’s members is not so much to be found in the ring as in the adversity of everyday racism and social exclusion. Boxing can therefore be understood as an act of resistance that is about more than simply fighting an opponent and that reflects all the existential struggles facing these men who are both stigmatized and socially dominated by race and class.

**The Familiarity of Strangers** Francesca Trivellato 2009-06-30

Taking a new approach to the study of cross-cultural trade, this book blends archival research with historical narrative and economic analysis to understand how the Sephardic Jews of Livorno, Tuscany, traded in regions near and far in the seventeenth and eighteenth centuries. Francesca Trivellato tests assumptions about ethnic and religious trading diasporas and networks of exchange and trade. Her extensive research in international archives—including a vast cache of merchants’ letters written between 1704 and 1746—reveals a more nuanced view of the business relations between Jews and non-Jews across the Mediterranean, Atlantic Europe, and the Indian Ocean than ever before. The book argues that cross-cultural trade was predicated on and generated familiarity among strangers, but could coexist easily with religious prejudice. It analyzes instances in which business cooperation among coreligionists and between strangers relied on language, customary norms, and social networks more than the progressive rise of state and legal institutions.

**Social Reform, Modernization and Technical Diplomacy** Véronique Plata-Stenger 2021-12-31

The aim is to publish studies that change focus back and forth from the intimacy and complexity of relationships in specific places and their connections to distant places and long-term processes of change thereby looking beyond locality and region.

**On the Death and Life of Languages** Claude Hagège 2009-01-01

Twenty-five languages die each year; at this pace, half the world’s five thousand languages will disappear within the next century. In this timely book, Claude Hagège seeks to make clear the magnitude of the cultural loss represented by the crisis of language death. By focusing on the relationship of language to culture and the
world of ideas, Hagge shows how languages are themselves crucial repositories of culture, the traditions, proverbs, and knowledge of our ancestors reside in the language we use. His wide-ranging examination covers all continents and language families to uncover not only how languages die, but also how they can be revitalized—for example in the remarkable case of Hebrew. In a striking metaphor, Hagge likens languages to bonfires of social behavior that leave behind sparks even after they die; from these sparks languages can be rekindled and made to live again.

The Left’s Jewish Problem Dave Rich 2016-09-06 There is a sickness at the heart of left-wing British politics, and though predominantly below the surface, it is silently spreading, becoming ever more malignant. With three separate inquiries into anti-Semitism in the Labour Party in the first six months of 2016 alone, it seems hard to believe that, until the 1980s, the British left was broadly pro-Israel. And while the election of Jeremy Corbyn may have thrown a harsher spotlight on the crisis, it is by no means a recent phenomenon. The widening gulf between British Jews and the anti-Israel left—born out of antipartheid campaigns and now alloying itself with Islamist extremists who demand Israel’s destruction—did not happen overnight or by chance: political activists made it happen. This book reveals who they were, why they chose Palestine and how they sold their cause to the left. Based on new academic research into the origins of this phenomenon, combined with the author’s daily work observing political extremism, contemporary hostility to Israel, and anti-Semitism, this book brings new insight to the left’s increasingly controversial ‘Jewish problem’.

Rationality and Intelligence Jonathan Baron 2005-07-07 Rationality and Intelligence develops and justifies a prescriptive theory of rational thinking in terms of utility theory and the theory of rational life plans. The prescriptive
theory, buttressed by other assumptions, suggests that people generally think too little and in a way that is insufficiently critical of the initial possibilities that occur to them. Argenter 2020-04-06 This manual is intended to fill a gap in the area of Romance studies. There is no introduction available so far that broadly covers the field of Catalan linguistics, neither in Catalan nor in any other language. The work deals with the language spoken in Catalonia and Andorra, the Balearic Islands, the region of Valencia, Northern Catalonia and the town of L’Alguer in Sardinia. Besides introducing the ideologies of language and nation and the history of Catalan linguistics, the manual is divided into separate parts embracing the description – grammar, lexicon, variation and varieties – and the history of the language since the early medieval period to the present day. It also covers its current social and political situation in the new local and global contexts. The main emphasis is placed on modern Catalan. The manual is designed as a companion for students of Catalan, while also introducing specialists of other languages into this field, in particular scholars of Romance languages.

Cinema and the Republican Jonathan Ervine 2013-05-15 This book analyses contemporary French films by focussing closely on cinematic representations of immigrants and residents of suburban housing estates known as banlieues. It begins by examining how these groups are conceived of within France’s Republican political model before analysing films that focus on four key issues. Firstly, it will assess representations of undocumented migrants known as sans-papiers before then analysing depictions of deportations made possible by the controversial double peine law. Next, it will examine films about relations between young people and the police in suburban France before exploring films that challenge clichés about these areas. The conclusion assesses what these films show about contemporary French political cinema.

Paul Zante Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.
