Crossing Languages to Play with Words: Sebastian-Knowle, Europe 2016-09-26 Workplay involving several linguistic codes represents an important modality of ludic language. It is situated in different epistemic, communicative situations, genres, and contexts of use. The translation of wordplay, which is generally seen as a challenging enterprise, illustrates another dimension of crossing linguistic borders at the nanometre level. The third volume of the series 'The Dynamics of Wordplay' adds contributions from different disciplines which study the creative and pleasurable use of elements from different languages and the trader of ludic language into other linguistic systems. It sheds light on the multidimensionality, special linguistic makeup, and specific interactive potential of wordplay at the interface of different languages and cultures. The individual studies collected in this volume will be of interest to scholars from different scientific fields, such as linguistics and literary studies as well as cultural and media studies.

Cellular and Molecular Mechanisms Underlying the Pathogenesis of Hepatic Fibrosis: Beer-Heiderström 2020-12-29 Workplay, liver fibrosis in a major cause of morbidity and mortality and is associated with a high medical and economic burden. It is the common consequence of various liver injuries and is a major concern for the health care system. During Fibrogenesis, there is a progression of changes in the liver parenchyma by four stages of progression. This book advances the understanding of the histology of liver fibrosis and shows that the pathogenesis is driven by different cell types and large variety of available mediators. At present, scientists working in the field aim to increase basic knowledge, improve diagnostics, and to try to experimental findings into new treatment modalities. This book includes 12 selected contributions from the Special Issue "Cellular and Molecular Mechanisms Underlying the Pathogenesis of Hepatic Fibrosis" that was published in Giga. These articles summarize current perspectives and findings in hepatic fibrosis research looking for scientific career to use basic scientific research to create new therapies and diagnostic.

Assessment of Responsible Innovation: Emad Yaghmaei 2020-11-09 Responsible innovations encourages innovation to work together with stakeholders during the research and innovation process, to better align the outcomes of innovation with the values, needs and expectations of society. Assessing the benefits and risks of Responsible Innovation is crucial for fostering the responsible conduct of science, technology and innovation. However, there is not yet any limited literature work on Responsible Innovation assessment. This book fills this library, Assessment of Responsible Innovation: Methods and Practices presents tools for measuring, monitoring, and reporting upon the Responsible Innovation process and the social, environmental, scientific, and economic impacts of interventions. These tools help innovators to mitigate risk and to strengthen their strategic planning. This book aligns assessment tools and practices with the U.S. Sustainable Development Goals (SDGs). The purpose as well as the limitations of various Responsible Innovation assessment approaches and tools are discussed, as well as their applicability to various industrial contexts. The book brings together leading scholars in the field of the assessment the most comprehensive reviews of Responsible Innovation tools. It articulates the importance of assessment and value creation, the different metrics and monitoring systems that can be deployed and the reporting mechanisms, including the importance of effective communication.

Adaptations for Concrete - Improvement of Properties: T. Vonpuhi 2014-11-21 Chemstruc admixtures are used to modify the properties of concrete and improve the behavior of fresh and hardened concrete. They enable more economic construction and the achievement of special properties such as high strength in durability. This book presents new research information from an International IALEN Symposium on main topics: workability, setting, strength, durability, other properties and technology.

Revue générale des sciences poes et appliquées 1939

The Second Automotive Revolution. Mark Morgan 2009-04-30 The rapid takeoff of the post-war-based national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automotive revolution through the importation of autonomous since the nineties.

Law Against Unfair Competition. Felix Hoey 2007-02-24 This book examines the present state of harmonization of unfair competition law in Europe. It discusses the particular approach to unfair competition law in the 10 new Member States and the possible impact on the future development of European unfair competition law. The book presents new insights in the importance of unfair competition especially in countries with a developing market economy.

The Future of the Global Economy Towards a Long Boom? OECD 1999-12-20 This book reviews the forces driving economic and social change in today's world. It assesses the likelihood of a long boom materializing in the first decades of the 21st century and explores the strategic policies essential for making it happen.

Biomechanization of the Organic Fraction of Municipal Solid Waste: J. Mato 2005 This book is intended for the introduction of the fundamentals

Narrative and Discursive Approaches in Entrepreneurship: Chris Steyaert 2003-01-01 ... the few books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, International Journal of Entrepreneurial Behaviour and Research. The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography or their main methodological approaches to social studies... The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is well achieved. Nicola Kostera, Scandinavian Journal of Management... The contributions in this book benefit from both fresh and imaginative linguistic resources and new/multiple iterations of reference into the inquiry of entrepreneurial activities. The narrative, the metaphor, the discursive and the performative are significant themselves, not only because they bring to the surface emotions, experiences and the relationship of (everyday) entrepreneurial activity that have possibly been previously obscured. But also, it is possible that researchers may explore the narrative in a serious and scholarly way. Denise Fletcher, International Small Business Journal. In their edited book Narrative and Discursive Approaches in Entrepreneurship, Daniel Hartford and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods and data in a straight-forward fashion. As a result, entrepreneurship studies is a subject of knowing how to interpret and use a story. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an internationally set of cases, including Russia, Sweden, Denmark, Norway, Yemen, and North America. The cases themselves make for fascinating readings, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, two drivers in Cyprus, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many other books which have in their title, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill. "Daniel Hartford and Chris Steyaert set out to advance the study of entrepreneurship by reframing the lens of discovery of economics, management and marketing to other paradigmatic studies in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporates both the content and place of entrepreneurship. From the perspective insights of the editors to the rigorous and provocatively discursive of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can mine new insights. The editors ask, how do these texts move you? they invite, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of entrepreneurship.

Enhancing the Role of Insurance in Cyber Risk Management: OECD 2017-12-08 This report provides an overview of the financial impact of cyber incidents, the coverage of cyber risk available in the insurance market, the challenges to market development and initiatives to address those challenges.

Ritual, Play, and Belief in Evolution and Early Human Societies: Colin Renfrew 2017-11-30 The origins of religion and ritual in humans have been the focus of centuries of thought in archaeology, anthropology, theology, evolutionary psychology and more. Play and ritual have many aspects in common, and ritual is a key component of the early cults that underlie the religious systems of the first complex societies in all parts of the world. This book examines the formative cults and the roots of religious practice from the earliest times until the development of early religion in the Near East, China, in Persia, in Mesopotamia and beyond. Here, leading pendants and other specialists bring a fresh approach to the early practices that underlie the faiths and religions of the world. They demonstrate the profound role of play ritual and belief systems and offer powerful new insights into the emergence of early civilization.

Polyurethane Elastomers: Cristina Piscareni 2011-07-03 A comprehensive account of the physical / mechanical behaviour of polyurethanes (PUs) is given, with an emphasis on comprehensive data available in the literature. The book includes an extensive up-to-date coverage of the most important topics, such as the structure-property relationships, processing, curing, mechanical properties, and thermal stability of polyurethanes. It is written from the perspective of a materials scientist and includes an extensive bibliography. The book is intended for researchers and engineers in the emerging field of polyurethanics and related industrial research in this area.
