**Perfect Me**
Heather Widdows 2018-05-15

How looking beautiful has become a moral imperative in today's world. The demand to be beautiful is increasingly important in today's visual and virtual culture. Rightly or wrongly, being perfect has become an ethical ideal to live by, and according to which we judge ourselves good or bad, a success or a failure. Perfect Me explores the changing nature of the beauty ideal, showing how it is more dominant, more demanding, and more global than ever before. Heather Widdows argues that our perception of the self is changing. More and more, we locate the self in the body—not just our actual, flawed bodies but our transforming and imagined ones. As this happens, we further embrace the beauty ideal. Nobody is firm enough, thin enough, smooth enough, or buff enough—not without significant effort and cosmetic intervention. And as more demanding practices become the norm, more will be required of us, and the beauty ideal will be harder and harder to resist. If you have ever felt the urge to "make the best of yourself" or worried that you were "letting yourself go," this book explains why. Perfect Me examines how the beauty ideal has come to define how we see ourselves and others and how we structure our daily practices—and how it entralls us with promises of the good life that are dubious at best. Perfect Me demonstrates that we must first recognize the ethical nature of the beauty ideal if we are ever to address its harms.

What Women Want  Paco Underhill
2011-07-19 The author of Why We Buy reports on the growing importance of women in everybody's marketplace--what makes a package, product, space, or service "female friendly." He offers a tour of the world's marketplace--with shrewd observations and practical applications to help everybody adapt to the new realities. Underhill examines how a woman's role as homemaker has evolved into homeowner; how the home gym and home office are linked to the women's health movement and home-based businesses; why the refrigerator has trumped the stove as the crucial appliance; why some malls are succeeding while others fail. "The point is," writes Underhill, "while men were busy doing other things, women were becoming a major social, cultural, and economic force." And, as he warns, no business can afford to ignore their power and presence--From publisher description.

Handbook of Medical Textiles  V Bartels
2011-08-19 With a rising population and the increasing range of textiles for medical products, the need to understand and improve medical textiles is gaining in importance. The Handbook of medical textiles provides an overview of the different types of medical textiles currently available as well as specific information on more specialised topics and applications. In part one, the types and properties of medical textiles are discussed, with chapters covering topics including reusable textiles, textiles for implants and textiles with cosmetic effects. Part two focuses on the interaction of textiles with the skin, examining key issues such as contact sensations, allergies and mechanical irritation. Chapters in part three provide information on the latest developments in textiles for hygiene and infection control, while part four provides a range of applications and case studies, including improvements in medical occupational clothing, medical filters and superabsorbent fibres. With its expert editor and contributions from some of the world's leading authorities, the Handbook of medical textiles is a standard reference for designers and manufacturers of medical textile products, as well as for biomaterials scientists and medical professionals.

field as do the
treatment recommendations which are based on the discussion of the best available evidence using a question-driven approach and a common structure on dealing with efficacy, drawbacks and implications for clinical practice.

Sun Protection in Man P.U. Giacomoni 2001-07-31 "Sun Protection in Man" looks at the beneficial and harmful effects of solar radiation. The physiological consequences of sun exposure have been systematically studied starting at the end of the nineteenth century and we now have accumulated knowledge about how Caucasian and Asian skins react to solar radiation. The chemical effects of solar ultraviolet radiation have been analyzed with particular emphasis during the second half of the twentieth century. Research on micro-organisms has allowed us to understand the mechanisms of UV-induced mutagenesis and photosensitization. Studies with laboratory rodents have opened the path to the understanding of UV-induced immune-depression, carcinogenesis, photo-damage and photo-aging. The results of these studies have enabled other scientists to investigate the same phenomena in human organs such as the skin and the eye. UV radiation damages hair, as well. The present knowledge in these fields is summarized in some of the chapters of this monograph. Mass phenomenon in Europe with the generalization of summer vacations which were a consequence of social reforms introducing the concept of "paid vacations". This created a need for protection and opened a market for sunscreens. This monograph is concerned with sun protection as a whole and is not just "another book on sunscreens". Nonetheless, in these days of general concern, it is important to learn about the efficiency of sunscreens. Several authors discuss how to reduce the number of impinging photons and explain why sunscreens seem to offer less protection than expected. Guidelines are given on how to use sunscreens in everyday life, which are expressed rigorously though clearly, for access to the common reader. Our knowledge on the relationship between sun and humans is at the early stages of development. Industrial and commercial activities are concerned by the development of this knowledge, and rules have been and will be promulgated to guarantee efficacy and safety of sun-products. It is hoped that this monograph will be of interest to the scholar, the layman and the legislator.

Analysis of Cosmetic Products Amparo Salvador 2011-08-11 Analysis of Cosmetic Products advises the reader from an analytical chemistry perspective on the choice of suitable analytical methods for production monitoring and quality control of cosmetic products. In the format of an easy-to-understand compendium of published literature on the subject, this book will enable people working in the cosmetic industry or in research laboratories to: * become familiar with the main legislative and analytical literature on this subject and * learn about and choose suitable analytical procedures for production monitoring and control of cosmetic products, according to their composition. The first section of Analysis of Cosmetic Products covers various definitions and concepts relating to cosmetic products, current legislation in different countries and specific legislation on ingredients. The central body of the book addresses analytical methods for monitoring and quality control of cosmetic products with the fundamental objective being to enable reader's access to scientific reviews carried out by experts in analytical chemistry. The final section contains a small review of the alternative methods to using animals for cosmetic product evaluation. * An essential resource for those in the cosmetic industry and research laboratories, allowing you to become familiar with the main analytical literature * Up-to-date and exhaustive overviews of current knowledge dealing with cosmetic analysis, general concepts and legislation * Including tables and figures, designed to graphically communicate important information in an easy-to-understand format

Physical Chemistry for Engineering and Applied Sciences A. K. Haghi 2018-07-03 This new volume, Physical Chemistry for Engineering and Applied Sciences: Theoretical and Methodological Implications, introduces readers to some of the latest research applications of physical chemistry. The compilation of this volume was motivated by the tremendous increase of useful research work in the field of physical chemistry and related subjects in recent years, and the need for communication between physical chemists, physicists, and biophysicists. This volume reflects the huge breadth and diversity in research and the applications in physical chemistry and physical chemistry techniques, providing case studies that are tailored to particular research interests. It examines the industrial processes for emerging materials, determines practical use under a wide range of conditions, and establishes what is needed to produce a new generation of materials. The chapter authors, affiliated with prestigious scientific institutions from around the world, share their research on new and innovative applications in physical chemistry. The chapters in the volume are divided into several areas, covering developments in physical chemistry of modern materials polymer science and engineering nanoscience and nanotechnology

The Mutant Project Eben Kirksey 2020-11-10 An anthropologist visits the frontiers of genetics, medicine, and technology to ask: Whose values are guiding gene editing experiments? And what does this new era of scientific inquiry mean for the future of the human species? "That rare kind of scholarship that is also a page-turner." –Britt Wray, author of Rise of the Necrofauna At a conference in Hong Kong in November 2018, Dr. He Jiankui announced that he had created the first genetically modified babies—twin girls named Lulu and Nana—sending shockwaves around the world. A year later, a Chinese court sentenced Dr. He to three years in prison for "illegal medical practice." As scientists elsewhere start to catch up with China's vast genetic research program, gene editing is fueling an innovation economy that threatens to widen racial and economic inequality. Fundamental questions about science, health, and social justice are at stake: Who gets access to gene editing technologies? As countries loosen regulations around the globe, from the U.S. to Indonesia, can we shape research agendas to promote an ethical and fair society? Eben Kirksey takes us on a groundbreaking journey to meet the key scientists, lobbyists, and entrepreneurs who are bringing cutting-edge genetic engineering tools like CRISPR—created by Nobel Prize-winning biochemists Jennifer Doudna and Emmanuelle Charpentier—to your local clinic. He also ventures beyond the scientific echo chamber, talking to disabled scholars, doctors, hackers, chronically-ill patients, and activists who have alternative visions of a genetically modified future for humanity. The Mutant Project empowers us to ask the right questions, uncover the truth, and navigate this brave new world.

Suntanning in 20th Century America Kerry Segrave 2005-08-31 The suntan experienced a profound change in the last century. Considered a mark of the lower class for hundreds of years, tanning became a fad in the early 1920s and remains popular today. The tan, though, was much more than a matter of fashion, enjoying at first a boost from the medical establishment. Opinions ranging from hard science to quackery lauded the suntan as something of a panacea. Near the end of World War II, however, researchers increasingly warned against the hazards of overexposure to the sun, and a large new industry developed--sunscreen. Americans' current paradoxical obsession with the tan developed almost entirely from the conflicting rays of twentieth century thought. This history examines the twentieth century suntan as a social and scientific phenomenon. Beginning with...
the years 1900-1920, it debunks the myth that changing attitudes toward the tan sprang largely from the world of fashion. Initial pro-tanning medical hype, emerging negative opinions of sunbathing near the middle of the century, the development of sunscreens, the debate over sunscreen efficacy, and the sunless tan are all covered here. Numerous pictures demonstrate changing perceptions of the suntan, displaying advertisements for products that promoted, prevented or healed tans.

Textbook of Cosmetic Dermatology
Robert Baran 2017-02-24 This text documents the science that lies behind the expanding field of cosmetic dermatology so that clinicians can practice with confidence and researchers can be fully aware of the clinical implications of their work. The Series in Cosmetic and Laser Therapy is published in association with the Journal of Cosmetic and Laser Therapy. Print Versions of this book also include access to the ebook version.

Monographs in Contact Allergy, Volume 1
Anton C. de Groot 2021-03-25
Monographs in Contact Allergy, Volume 1: Non-Fragrance Allergens in Cosmetics (Part 1 and Part 2) is the first 2-part volume in an exciting series on contact allergy. It presents over 500 natural or synthetic chemicals and compounds which have caused allergic contact dermatitis in cosmetic products. Included here are INCI names, synonyms, description/definition, CAS and EU numbers, chemical class, function in cosmetics, molecular formula, structural formula and advice on patch tests. A full literature review is given of patch testing in patients, case reports of cosmetic allergic contact dermatitis, irritant contact dermatitis, photosensitivity, immediate contact reactions and systemic side effects. This text is suitable for anyone with an interest in contact allergy, from university students to professionals, and all readers will find this informative and detailed series an invaluable resource. Key Features: Monographs of all known non-fragrance chemicals and substances which have caused allergic contact dermatitis from their presence in cosmetic products Provides lists of all functional groups (such as antioxidants, preservatives, artificial nail building, emollients, hair dyeing, hair colorants) in both the EU and US formats and all chemicals in these groups which have caused cosmetic allergy Presents an alphabetical list of all synonyms indicating their INCI names Reported cross-reactions, pseudo-cross-reactions and co-reactions, patch test sensitization and presence in cosmetic products (including data from FDA’s Voluntary Cosmetic Registration Program) and chemical analyses are discussed Covers an extensive amount of information to benefit dermatologists, allergists, and non-medical professionals involved with the research, development and marketing of cosmetic products

Glycerol Mario Pagliaro 2017-02-28
Glycerol: The Renewable Platform Chemical provides a valuable overview of the glycerol market, including industrial applications and sustainable production of glycerol. Replacing previous works on the subject, this useful resource describes glycerol, also known as glycerine, and its chemical derivatives, especially the new bioglycerol-derived products. The monograph also discusses how the industrial use of glycerol as raw material for producing commodity chemicals depends on broader scope and lower cost of the catalytic process used to convert glycerol of varying purity grades into valued monomers. New chapters on glycerol polymers, the use of glycerol as antifreeze, and its sustainable production offer relevant information.
for researchers and professionals from academics and industry alike. The book features new processes, such as low cost and biocompatible glycerol polymers as a major alternative to the conventional polymers, with the first practical applications now emerging in the biomedical and patient care markets. The book offers both a source of inspiration for new projects and a reliable source of information on how glycerol is replacing petrochemicals in many real world applications.

Features completely unique information and insight from leading expert Mario Pagliaro, including recent developments in the field, gathered from over a decade of intense R&D activities. Includes new chapters on the glycerol market, glycerol polymers, the use of glycerol in the cement and construction industries, its use as an antifreeze, and its sustainable production. Contains reliable, accessible information appropriate for research chemists and chemical engineers in the chemical, oleochemicals, biodiesel, biotechnology and cement industries as well as in academia.

*Gives an indispensable guide to a hotly competitive area for research and practice*

Trigger Warning Neil Gaiman 2015-02-03
Multiple award winning, #1 New York Times best selling author Neil Gaiman returns to dazzle, captivate, haunt, and entertain with this third collection of short fiction following Smoke and Mirrors and Fragile Things—which includes a never-before published American Gods story, “Black Dog,” written exclusively for this volume. In this new anthology, Neil Gaiman pierces the veil of reality to reveal the enigmatic, shadowy world that lies beneath. Trigger Warning includes previously published pieces of short fiction—stories, verse, and a very special Doctor Who story that was written for the fiftieth anniversary of the beloved series in 2013—as well “Black Dog,” a new tale that revisits the world of American Gods, exclusive to this collection. Trigger Warning explores the masks we all wear and the people we are beneath them to reveal our vulnerabilities and our truest selves. Here is a rich cornucopia of horror and ghosts stories, science fiction and fairy tales, fabulism and poetry that explore the realm of experience and emotion. In Adventure Story—a thematic companion to The Ocean at the End of the Lane—Gaiman ponders death and the way people take their stories with them when they die. His social media experience A Calendar of Tales are short takes inspired by replies to fan tweets about the months of the year—stories of pirates and the March winds, an igloo made of books, and a Mother’s Day card that portends disturbances in the universe. Gaiman offers his own ingenious spin on Sherlock Holmes in his award-nominated mystery tale The Case of Death and Honey. And Click-Clack the Rattlebag explains the creaks and clatter we hear when we’re all alone in the darkness. A sophisticated writer whose creative genius is unparalleled, Gaiman entrances with his literary alchemy, transporting us deep into the realm of imagination, where the fantastical becomes real and the everyday incandescent. Full of wonder and terror, surprises and amusements, Trigger Warning is a treasury of delights that engage the mind, stir the heart, and shake the soul from one of the most unique and popular literary artists of our day.

Human Enhancement Drugs Katinka van de Ven 2019-07-02
Despite increasing
interest in the use of human enhancement drugs (HEDs), our understanding of this phenomenon and the regulatory framework used to address it has lagged behind. Encompassing public health, epidemiology, neuroethics, sport science, criminology, and sociology, this book brings together a broad spectrum of scholarly insights and research expertise from leading authorities to examine key international issues in the field of HEDs. As "traditional" and other "new" drug markets have occupied much of the academic attention, there has been a lack of scholarly focus on human enhancement drugs. This book provides readers with a much-needed understanding of the illicit drug market of HEDs. The authors, from a variety of cultural contexts, disciplines and perspectives, include both academics and practitioners.

Topics explored in this collection amongst others include: • The anti-doping industry and performance and image enhancing drugs • Steroids and gender • The use of cognitive enhancing drugs in academia • The use of sunless synthetic tanning products • The (online) trade of HEDs • Regulations of the enhancement drugs market This collection will serve as a reference for students, academics, practitioners, law enforcement and others working in this area to reflect on the current state of research and consider future priorities. This detailed exploration will provide a valuable knowledge base for those interested in human enhancement drugs, while also promoting critical discussion.

F*ck Off, Chloe! Jeremy Murphy 2022-03-01 A laugh-out-loud account of working in media! Public relations' snarkiest publicist Jeremy Murphy expertly chronicles his hatred, love, indifference, amusement, and scorn for the profession in F*ck Off, Chloe!. From entitled millennials to surly reporters, obnoxious clients, and cumbersome, color-coded “trackers,” Murphy takes a scalpel and glass of Châteauneuf-du-Pape to the PR industry in a searing, hilarious, and pissy voice that his own psychiatrist finds "deeply concerning." His collection of annoyances shed light on the industry’s idiosyncrasies, insanities, contradictions, and past due invoices, providing an illuminating window into the dirty world of public relations not even Xanax can help. Complementing the scathing prose are color-in illustrations by artist Darren Greenblatt, creator of the “Ugly Lives of Beautiful People” sketch series.

**Shedding Light on Indoor Tanning**
Carolyn J. Heckman 2011-09-15 Since the industrialization and urbanization of the Western workforce, tanned skin has been perceived increasingly as attractive and fashionable for naturally light-skinned individuals. However, in addition to causing tanning, photo-aging, and other health effects, ultraviolet radiation (UV) is a well-known carcinogen. Despite wide-spread awareness of UV risks, tanning has become increasingly popular in several Western countries including the USA. While millions of individuals tan indoors each day, relatively little is known about this phenomenon. This book fills that gap by providing an overview of indoor tanning, reasons for its popularity, its risks including skin cancers, and the public health context surrounding the behavior. We have invited some of the preeminent experts in the field to summarize the existing scientific literature for each of the chapters. Shedding Light on Indoor Tanning is an up-to-date and comprehensive book that provides a unique and essential overview of the most significant current issues related to indoor tanning for scientists, educators, students, clinicians, and the general public interested in dermatology, aesthetic trends, skin care, and skin cancer.

Microtrends Mark Penn 2007-09-05 "The ideas in his book will help you see the world in a new way." - Bill Clinton "Mark Penn has a keen mind and a fascinating sense of what makes America tick, and you see it on every page of Microtrends." - Bill Gates In 1982, readers discovered Megatrends. In 2000, The Tipping Point entered the lexicon. Now, in Microtrends, one of the most respected and sought-after analysts in the world articulates a new way of understanding how we live. Mark Penn, the man who identified "Soccer Moms" as a crucial constituency in President Clinton's 1996 reelection campaign, is known for his ability to detect relatively small patterns of behavior in our culture—microtrends that are wielding great influence on business, politics, and our personal lives. Only one percent of the public, or three million people, is enough to launch a business or social movement. Relying on some of the best data available, Penn identifies more than 70 microtrends in religion, leisure, politics, and family life that are changing the way we live. Among them: People are retiring but continuing to work. Teens are turning to knitting. Geeks are becoming the most sociable people around. Women are driving technology. Dads are older than ever and spending more time with their kids than in the past. You have to look at and interpret data to know what's going on, and that conventional wisdom is almost always wrong and outdated. The nation is no longer a melting pot. We are a collection of communities with many individual tastes and lifestyles. Those who recognize these emerging groups will prosper. Penn shows readers how to identify the microtrends that can transform a business enterprise, tip an election, spark a movement, or change your life. In today's world, small groups can have the biggest impact.

Understanding Hate Crimes Carolyn Turpin-Petrosino 2015-03-27 Hate crimes and lesser acts of bigotry and intolerance are seen to be constants in today's world. Since 1990, the federal government has published annual reports on hate crime incidents in the United States. While the reported numbers are disturbing, even more devastating is the impact of these crimes on individuals, communities, and society. This comprehensive textbook can serve as a
stand-alone source for instructors and students who study hate crimes and/or other related acts. It invites the reader to consider relevant social mores and practices as well as criminal justice policies as they relate to hate crimes by presenting this subject within a broad context.

**The Radioactive Boy Scout**
Ken Silverstein 2004-03-02
Growing up in suburban Detroit, David Hahn was fascinated by science, and his basement experiments—building homemade fireworks, brewing moonshine, and concocting his own self-tanning lotion—were more ambitious than those of other boys. While working on his Atomic Energy badge for the Boy Scouts, David’s obsessive attention turned to nuclear energy. Throwing caution to the wind, he plunged into a new project: building a nuclear breeder reactor in his backyard garden shed. In The Radioactive Boy Scout, veteran journalist Ken Silverstein recreates in brilliant detail the months of David’s improbable nuclear quest. Posed as a physics professor, David solicited information on reactor design from the U.S. government and from industry experts. (Ironically, the Nuclear Regulatory Commission was his number one source of information.) Scavenging antiques stores and junkyards for old—
fashioned smoke detectors and gas lanterns—both of which contain small amounts of radioactive material—and following blueprints he found in an outdated physics textbook, David cobbled together a crude device that threw off toxic levels of radiation. His unsanctioned and wholly unsupervised project finally sparked an environmental catastrophe that put his town’s forty thousand residents at risk and caused the EPA to shut down his lab and bury it at a radioactive dumpsite in Utah. An outrageous account of ambition and, ultimately, hubris that sits comfortably on the shelf next to such offbeat science books as Driving Mr. Albert and stories of grand capers like Catch Me If You Can, The Radioactive Boy Scout is a real-life adventure with the narrative energy of a first-rate thriller.

**Cosmetic & Toiletry Formulations**
Ernest W. Flick 2014-06-28 Cosmetic and Toiletry Formulations, Second Edition, Volume 2, contains more than 1,900 cosmetic and toiletry formulations, based on information received from numerous industrial companies and other organizations. The data represent selections from manufacturers' descriptions made at no cost to, nor influence from, the makers or distributors of these materials. All of the trademarked raw materials listed are believed to be available, which will be of interest to readers concerned with raw material discontinuances. Each formulation in the book is identified by a description of end use. The formulations include the following as available, in the manufacturer's own words: a listing of each raw material contained; the percent by weight of each raw material; suggested formulation procedure; and the formula source, which is the company or organization that supplied the formula.

**Sustainable Biofuels Development in India**
Anuj K. Chandel 2017-03-14 This book will provide assistance to the broad range of readers involved in the crude oil import and production; renewable energy production; biomass analysis and bioconversion; greenhouse gas emissions; techno-economic analysis and government policies for implementing biofuels in India. This book presents important aspects on the large scale production of biofuels following a bio-refinery concept and its commercialization and sustainability issues. Hence, it is a useful resource to policy makers, policy analysts, techno-economic analysts and business managers who deal with commercialization and implementation of bio-based energy and other value-added products. The following features of this book attribute its distinctiveness: As a first uniquely focused scientific and technical literature on bioenergy production in the context of India. To its coverage of technological updates on biomass collection, storage and use, biomass processing, microbial fermentation, catalysis, regeneration, solar energy and monitoring of renewable energy and recovery process. To the technical, policy analysis, climate change, geopolitical analysis of bioenergy and green transportation fuels at industrial scale.
