The Architecture Of The Roman Empire

Ancient Roman architecture - Wikipedia
The Roman Architectural Revolution, also known as the Concrete Revolution, was the widespread use in Roman architecture of the previously little-used architectural forms of the arch, vault, and dome. For the first time in history, their potential was fully exploited in the construction of a wide range of civil engineering structures, public buildings, and military facilities.

Roman Architecture: Characteristics, Building Techniques
Roman architecture has had a colossal influence on building construction in the West. If Greek architects established the main design templates, Roman architects established the basic engineering prototypes. Thanks to their mastery of the arch, vault and dome, they set the standard for most types of monumental architecture.

An introduction to ancient Roman architecture - Smarthistory
Roman architecture differed fundamentally from this tradition because of the discovery, experimentation and exploitation of concrete, arches and vaulting (a good example of this is the Pantheon, c. 125 C.E.).
