Classical Studies Fred W. Jenkins 2006 Why study the classics? For one thing, classicists have the distinguished pedigree of being among the first humanists to see and exploit the educational possibilities of new developments in information technology. Even better, they can translate such tantalizing tattoos as quod me nutrit me destruit, a quote which most famously resides on Angelina Jolie’s belly. For these and other intrepid explorers of the minds of the past, Fred Jenkins offers a newly revised and expanded annotated bibliography of book-length reference works, covering the rise and fall of the Greek and Roman civilizations from the Bronze Age through the 6th century AD. While preference has been given to English-language works, many important titles in French, German, Italian, and Spanish have also been included. There is also increased coverage of ancient philosophy, religion (including early Christianity), and art and archaeology. A History of Roman Literature Michael von Albrecht 1997

The Roman Alexander Diana Spencer 2002 This book seizes on one of the eternal objects of widespread attention in Ancient History and turns the tables on the scholarship that has shaped and dominated the field. Instead of scrutinising the documents in order to reconstruct the biography and assess the historical significance, Diana Spencer traces the deployment and development of the mythical figure of Alexander. She explores and synthesises a selection of Latin texts, from the Late Republic to Hadrian, to form a series of themed discussions which investigate the cultural significance of Alexander for Rome. The selected texts - drawn from verse and prose, history, epic and oratory - are presented alongside their English translation, and provide an insight into a world where to think about Alexander was to engage with the burning ideological issues of Rome during a period of intense and often violent political and cultural change. The book makes clear how particular texts and issues may be readily accessed, providing a valuable resource for teachers and their students, whilst also offering a new approach to cultural histories of Rome and Alexander.

The Reader Bernhard Schlink 2001-05-01 Hailed for its coiled eroticism and the moral claims it makes upon the reader, this mesmerizing novel is a story of love and secrets, horror and compassion, unfolding against the haunted landscape of postwar Germany. When he falls ill on his way home from school, fifteen-year-old Michael Berg is rescued by Hanna, a woman twice his age. In time she becomes his lover-then she inexplicably disappears. When Michael next sees her, he is a young law student, and she is on trial for a hideous crime. As he watches her refuse to defend her innocence, Michael gradually realizes that Hanna may be guarding a secret she considers more shameful than murder.

Authors, Authority and Interpreters in the Ancient Novel Gareth L. Schmeling 2006 For most of us there are many masters and varied causes for intellectual peregrinations. For the editors of this volume, for many scholars of the ancient novel, and for an uncounted number of students of Classics and the Humanities, Gareth Lon Schmeling is a master and motivator of our scholarly and academic careers, especially of our forays into the ancient novel. And above all Gareth is a true friend. This volume of essays is a small, and, we hope, representative offering of our thanks to Gareth for his contributions to the study of the ancient novel in particular and Classics in general, for his guidance and support in our own endeavors, and for his own special humanity.

The Interpretation of Roman Poetry Karl Galinsky 1992 In this thought-provoking volume, fifteen well-known scholars from the U.S. and Europe focus on the current state of the interpretation of Roman poetry and on its future tasks. Among the timely subjects they discuss is the role of theory, genre, and historicism, and the survival of the New Criticism. The strengths and limitations of a variety of approaches are considered, debated, and illustrated with the interpretation of specific examples from Roman poetry. A recurring theme is the need for increased methodological reflection. The Introduction assesses the present state of the interpretation of Roman poetry on the contemporary scene of literary criticism. Contributors include G.B. Conte, Charles Segal, Francis Cairns, Jasper Griffin, Michael von Albrecht, and W.R. Johnson.

Ancient Roman Writers - Ward W. Briggs 1999
The history of Rome is essentially the history of one nation imitating another, namely Greece. The Romans invented only one genre, the satire. Roman writers borrowed their subject matter from the Greeks in all but one respect, history. Several of these Roman authors were slaves or came from slave families. It was the Greek-speaking early-freed slaves that taught the Romans to give their literature subjectivity.

Patterned Lives - Cornelia Niekus Moore 2006

Pedants in the Apparel of Heroes - Jennifer Valerie Ebberle 2001
Ancient letters have generally been treated as “snapshots” of everyday life or “mirrors” of their author’s soul. As such, they have been used uncritically as biographical or historical sources. The first half of this study critiques traditional approaches to ancient letters. The final two chapters, following in the tradition of recent work on the letter as a medium for self-fashioning, focuses on the intersection of epistolary form, content, and cultural context to argue that letters played an integral part in the integration of individual subjectivity and in the management of that subjectivity. The letters of ancient writers are primarily prose and come from a variety of periods ranging from Cicero’s late republican Rome to Augustine’s North Africa to Ennodius' sixth-century Northern Italy. Chapter 1 revisits the polemical debate (the battle of the books) at the end of the seventeenth century that produced Richard Bentley’s influential Dissertation upon the Epistles of Phalaris to demonstrate that many of the trends in contemporary epistolary studies derive directly or indirectly from Bentley’s work. Chapter 2 treats the question of genre using Foucauldian genealogy to make the point that Cicero’s privileged status in the genre’s history, and the very notion of a coherent genre of letter-writing in classical antiquity, owes much to the genre’s reception in the fourth century. Chapter 3 moves from broader questions of genre-construction and the history of reading ancient letters to a theorization of the related epistolary motifs of absence and desire. The material letter functions as a metonym for the absent body of its author; but, as a metonym, it can never fully replace the absent body and alleviate the addressee’s desire for presence. Chapter 4 returns to the dynamic of the letter exchange to argue that its inherent dialogism can be used both to create and circulate a textualized self, and also to script roles for one’s correspondent, as seems to happen in Augustine’s correspondence with Jerome. The conclusion reflects on the potency of the letter as a metaphor for literature writ large in the works of such post-structuralist theorists as Barthes, Derrida, and Lacan.

History Of Roman Literature, From Its Earliest Period To The Augustan Age John Colin Dunlop 1824
Masters of Roman Prose from Cato to Apuleius Michael von Albrecht 1989 In this commented anthology of Latin prose, Michael von Albrecht selects texts from a span of Roman literature covering four centuries. A summary of the contents will indicate its range and variety: M. Porcius Cato (the preface to De agricultura, a passage from the speech for the Rhodians of 167 B.C., and a section from the Origines); republican oratory (C. Gracchus, from De legibus promulgatis of 122 B.C. and Cicero from In Verrem II); Caesar as orator and historian; two passages of Sallust; a comparison of Claudius Quadrigarius and Livy as historiographers; philosophical texts from Cicero and the Younger Seneca; and chapters on Petronius, Tacitus, Pliny the Younger, and Apuleius. The method of the book is practical, based on actual interpretation of specific texts rather than on literary theory (ancient or modern). Each text (printed first in Latin and then in English) is followed by a detailed and flexible discussion, somewhere between essay and commentary. No set pattern is imposed - rather the nature of the text governs the shape of its analysis - but Professor von Albrecht's vivid scholarly exposition covers most dimensions of the art of Latin prose-writing. The book's variety of texts and close treatment of specific Latin passages make it an ideal coursebook for the study of Latin prose. But behind its accessibility lies scholarship of the highest order: Professor von Albrecht's exemplary erudition reveals itself in the extensive annotation underpinning his main text; and researchers in any of the fields covered by Latin prose-writers - philosophy, politics, history, letters, practical handbooks, entertainment - will find this book a valuable resource. This book was originally published in German (Meister römischer Prosa von Cato bis Apuleius, 1971). It has been accurately and sympathetically translated by Neil Adkin.
