Heroin Addiction and Drug Policy John Strang 1994 The "British System" is known world-wide as a highly effective means of managing heroin addiction. Drs. Strang and Gossop have for many years been actively involved in research into clinical practice. In this book, they present an overview of British drug policy set in the context of international activities, with contributions from key figures in the field, covering both historical and contemporary aspects of the evolving "British System." Several contributors give previously unrecorded accounts of events during critical phases in the evolution of the UK response to illicit drug use, while others outline the critical issues within today's policy reviews.

Journeys Erased by Time: The Rediscovered Footprints of Travellers in Egypt and the Near East Neil Cooke 2019-06-27 Early travellers in Egypt and the Near East made great contributions to our historical and geographical knowledge and gave us a better understanding of the different peoples, languages and religions of the region. Travellers in this volume are a mixture of rich and poor, bravely adventuring into the unknown, not knowing if would ever return home.

The End of the Road Alasdair Fotheringham 2016-05-05 The Tour de France is always one of the sporting calendar's most spectacular and dramatic events. But the 1998 Tour provided drama like no other. As the opening stages in Ireland unfolded, the Festina team's soigneur Willy Voet was arrested on the French–Belgian border with a car-load of drugs. Raid after police raid followed, with arrest after arrest hammering the Tour. In protest, there were riders' strikes and go-slow, with several squads withdrawing en masse and one expelled. By the time the Tour reached Paris, just 96 of the 189 starters remained. And of those 189 starters, more than a quarter were later reported to have doped. The 1998 'Tour de Farce's' status as one of the most scandal-struck sporting events in history was confirmed. Voet's arrest was just the beginning of sport's biggest mass doping controversy – what became known as the Festina affair. It all but destroyed professional cycling as the credibility of the
entire sport was called into question and the cycling family began to split apart. And yet, ironically, the 1998 Tour was also one of the best races in years. The End of the Road is the first English-language book to provide in-depth analysis and a colourful evocation of the tumultuous events during the 1998 Tour. Alasdair Fotheringham uncovers, step by step, how the world’s biggest bike race sank into a nightmarish series of scandals that left the sport on its knees. He explores its long-term consequences—and what, if any, lessons were learned.

Queens, Concubines, and Dowagers Pauline Stafford 1998 ‘Between the sixth and eleventh centuries, many women exercised a profound influence on the politics of Western Europe. The histories of Frankia, Italy, and England would have been different had it not been for queens such as Brunhild, Judith, Angelberga, Emma and others. This is a composite biography of the early queens and royal bedfellows and provides a fascinating picture of their political importance and the many factors that affected their personal lives. Woven with the political story of these women is the story of courtships, weddings, dowries; the anxieties of confinements, sterility and infant mortality; the tense relationships with in-laws; and the peaceful, if often involuntary, religious retirement of widowhood. A fascinating study of a period in world history that requires more illumination. Maps and charts are excellent. Highly recommended.’ Genealogical Library Journal

The Future of Music David Kusek 2005 Discusses the transition from a business model based on traditional music outlets to digitally-based music products and distribution channels and the impact of the change on the future of the music trade and on the consumer.

Dislocating the Orient Daniel Foliard 2017-04-13 While the twentieth century’s conflicting visions and exploitation of the Middle East are well documented, the origins of the concept of the Middle East itself have been largely ignored. With Dislocating the Orient, Daniel Foliard tells the story of how the land was brought into being, exploring how maps, knowledge, and blind ignorance all participated in the construction of this imagined region. Foliard vividly illustrates how the British first defined the Middle East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps. Until then, the region had never been clearly distinguished from “the East” or “the Orient.” In the course of their colonial activities, however, the British began to conceive of the Middle East as a separate and distinct part of the world, with consequences that continue to be felt today. As they reimagined boundaries, the British produced, disputed, and finally dramatically transformed the geography of the area—both culturally and physically—over the course of their colonial era. Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being, Dislocating the Orient will interest historians of the Middle East, the British empire, cultural geography, and cartography.

Houses and Households Richard E. Blanton 2013-06-29 The author presents a large comparative database derived from ethnographic and architectural research in Southeast Asia, Egypt, Mesoamerica, and other areas; proposes new methodologies for comparative analyses of houses; and critically examines existing methodologies, theories, and data. His work expands on and systematizes comparative and cross-cultural approaches to the study of households and their environments to provide a firm foundation for this emerging line of study.

Vive le Tour! Nick Brownlee 2013-07-23 The Observer, July 1, 2007 "A quirky and inventive collection of history, statistics and random trivia, Brownlee's book would be perfect for whipping out of the back pocket of your cycling jersey to settle arguments or impress your friends." The Guardian, 30 June, 2007 "an accessible if at first unprepossessing blend of history-lite, helpful explanation and bizarre factoids." The Tour De France is one of the most revered, thrilling sporting events in the world, not to mention one of the most physically exhausting. Every year top cyclists from around the globe break speed records and push themselves harder and faster in pursuit of the legendary yellow jersey. Vive le Tour! is the ultimate guide to the competition's heroes, cheats, controversy, extreme terrain, triumphs and tragedy - on and off the trail. Now fully revised and updated, this edition reflects the huge interest generated in the Tour thanks to the recent success of British cyclists, the high-profile launch of Team Sky in 2010 and the fact that the event once again returns to freeview TV (ITV 4). Vive Le Tour! is your essential companion to this awe-inspiring event, with a wealth of tales and trivia drawn from the Tour's century-long history.

Travellers in Ottoman Lands Ines Aščerić-Todd 2018 This splendidly illustrated book focuses on the botanical legacy of many parts of the former Ottoman Empire -- including present-day Turkey, the Levant, Egypt, the Balkans, and the Arabian Peninsula -- as seen and described by travellers both from within and from outside the region.

From Lance to Landis David Walsh 2007-06-26 For eight years, the Tour de France, arguably the world's most demanding athletic competition, was ruled by two men: Lance Armstrong and Floyd Landis. On the surface, they were feature players in one of the great sporting stories of the age--American riders overcoming tremendous odds to dominate a sport that held little previous interest for their countrymen. But is this a true story, or is there a darker version of the truth, one that sadly reflects the realities of sports in the twenty-first century? Landis's title is now in jeopardy because drug tests revealing that his testosterone levels were eleven times those of a normal athlete strongly suggest that he used banned substances, and for years similar allegations have swirled around Armstrong. Now internationally acclaimed award-winning journalist David Walsh gives an explosive account of the shadow side of professional sports. In this electrifying, controversial, and scrupulously documented exposé, Walsh explores the many facets of the cyclist doping scandals in the United States and abroad. He examines how performance-enhancing drugs can infiltrate a premier sports event--and why athletes succumb to the pressure to use them. In researching this book, Walsh conducted hundreds of hours of interviews with key figures in international cycling, doctors, and other insiders, including Emma O'Reilly, Armstrong's longtime massage therapist; former U.S. Postal Service cycling team doctor Prentice Steffen; cycling legend Greg LeMond; and former teammates of both Landis and Armstrong. Central to the story is Lance Armstrong's relentless, all-consuming drive to be the best. Also essential to this narrative is Floyd Landis, the unassuming, sympathetic hero who was the first winner of the Tour de France after Lance--and the first ever to face the threat of having his title revoked. More than anything else, this book will ignite anew the debate about whether there is room in the current sports culture for athletes who compete honestly, whether sports can be saved from a scandal as widespread as this, and what changes will have to be made. With a compelling narrative and revelations that will stun, enlighten, and haunt readers, David Walsh addresses numerous questions that arise in that crucial space where sports meet the larger American culture.

Massacre à la chaîne Willy Voet 1999-01-01T00:00:00+01:00 "Écrire un livre vérité sur les mensonges du cyclisme, passer à rebrousse-poil trente ans de silence, témoiner de l'envers d'un décor auquel j'ai longtemps appartenu, non, croyez-moi, ça n'a pas été facile. Et puis, j'entends déjà les sarcasmes : briseur de rêve, cracheur dans la soupe, fossoyeur d'un
sport populaire. Oui, c'est ainsi qu'on peut le prendre si l'on ne veut rien savoir, pourvu que la roue tourne. Mais à quel prix... Non, il n'est pas facile de révéler ces pratiques. Non, il n'est pas facile de se mettre à nu et d'affronter le regard de l'opinion publique. Souvent, je me suis interrogé. As-tu le droit de faire ce que personne n'avait fait avant toi ? Peux-tu prendre la lourde responsabilité de briser la loi du silence ? Aurais-tu rédigé ce livre si, le 8 juillet 1998, tu n'avais pas été appréhendé par les douaniers ? J'ai réfléchi, j'ai hésité. Car, je le reconnais, sans ma garde à vue, sans mes seize jours de prison, jamais je n'aurais compris. La force de l'habitude, la routine, le confort. Puis j'ai réalisé qu'il le fallait. Quitte à briser des légendes. Quitte à faire mal.” W.V.

The Naos of the Decades

Anne-Sophie von Bomhard 2008 This monograph presents the almost completely reconstituted Naos of the Decades with an excellent set of photographic images. The four additional fragments, recovered in East Canopus during the excavations of the European Institute of Underwater Archaeology, are examined with the two original fragments from the Louvre and Greco Roman Museum (Egypt). The largest of the new fragments consists of a cosmogony of over 20 columns with no known parallel, disproving the order of the decades as it was initially assumed and suggesting a far older tradition of Egyptian astrology. Professor Patrice MANGIN President of the XVlth Congress of the International Academy of Legal Medicine and Social Medicine The International Academy of Legal Medicine and Social Medicine was founded in 1938 in Bonn. The motive for founding the Academy was to promote associating and confronting on an international background the scientific research work produced in the various domains dealing with the Legal and Social Medicine. As first presi dent of the International Academy of Legal Medicine and Social Medicine, Professor Knud Sand from Copenhagen, assisted by colleagues of the Praesidium appointed as national representatives, succeeded in gathering together nearly the whole academic people involved in Legal and Social Medicine. Thus one year later, in 1939, The Academy became a worldwide institution of 450 members from thirty nations. After the war, what had been before of considerable interest for the progress of the knowledge and techniques in Legal Medicine remained again a pressing necessity leading to the second meeting of the Academy in 1947 in Brussels under the presidency of Professor De Laet. Since then the meetings of the Academy followed one another every three years. At this point, I would like to thank all the past presidents of the Academy and in particular Professor Roche and Professor Andre for their contribution without which the Academy would not be what it is presently.

The Death of Marco Pantani

Matt Rendell 2012-11-15 The intimate biography of the charismatic Tour de France winner Marco Pantani, now updated to include the 2014 and 2015 investigation into Pantani's death. National Sporting Club Book of the Year Shortlisted for the William Hill Sports Book of the Year Award 'An exhaustively detailed and beautiful book . . . a fitting, ambivalent tribute - to the man, and to the dark heart of the sport he loved' Independent On Valentine’s day 2004, Marco Pantani was found dead in a cheap hotel. It defied belief: Pantani, having won the rare double of the Giro d’Italia and the Tour de France in 1998, was regarded as the only cyclist capable of challenging Lance Armstrong’s dominance. Only later did it emerge that Pantani had been addicted to cocaine since 1999. Drawing on his personal encounters with Pantani, as well as exclusive access to his psychoanalysts, and interviews with his family and friends, Matt Rendell has produced the definitive account of an iconic sporting figure.

Oratio Obliqua, Oratio Recta

Fran?ois Raecanati 2000 Among the entities that can be mentally or linguistically represented are mental and linguistic representations themselves. That is, we can think and talk about speech and thought. This phenomenon is known as metarepresentation. An example is "Authors believe that people read books." In this book
François Recanati discusses the structure of metarepresentation from a variety of perspectives. According to him, metarepresentations have a dual structure: their content includes the content of the object-representation (people reading books) as well as the “meta” part (the authors’ belief). Rejecting the view that the object representation is mentioned rather than used, Recanati claims that since metarepresentations carry the content of the object representation, they must be about whatever the object representation is about.

Metarepresentations are fundamentally transparent because they work by simulating the representation they are about. Topics covered in this wide-ranging work include the analysis of belief reports and talk about fiction, world shifting, opacity and substitutivity, quotation, the relation between direct and indirect discourse, context shifting, semantic pretense, and deference in language and thought.

*Unfolding the Orient* Paul Starkey 2001 Egypt and the Near East have enchanted many people over the centuries. Travellers from the West have journeyed to this region for a variety of motives: in pursuit of knowledge, power, diplomacy and trade, for pleasure and adventure, on pilgrimage, and to plunder and discover the exotic—sometimes simply to discover themselves. Some have been influenced more than others by what they saw; bringing back tangible evidence of their visits, in the form of antiquities or other collectors' items; others have used their observations and experiences for their own literary and artistic ends.

*Congenital Dysplasia and Dislocation of the Hip in Children and Adults* Dietrich Tönnis 2012-12-06 For more than 100 years, congenital dislocation of the hip has been an area of concern in orthopedics. This publication on the subject are almost too numerous to count. Yet our knowledge of the basic principles of congenital hip dislocation and its management is constantly being expanded by new research. In German-speaking countries, Kaiser published the last comprehensive textbook on congenital hip dislocation in 1958, and Schlegel followed with a comprehensive handbook in 1961. In the Angloamerican world, Coleman's monograph was published in 1978, Somerville's in 1982, and Wilkinson's in 1985. In 1982 Tachdjian compiled a volume on congenital hip dislocation that contained contributions from 44 authorities. The purpose of the present book is to provide an overview of our present state of knowledge of congenital hip dislocation, covering basic principles, diagnosis, methods of closed and open treatment, and indications. In the process, an attempt is made to trace progress in the field from its beginnings to the present time. Many authors describe the diagnosis and treatment of congenital hip dysplasia and dislocation in terms of specific age groups. We believe it is more prudent to take an individualized approach based on arthrographic findings and the degree of severity of pathologic changes. Less emphasis is placed here on the management of patients by age group.

*Suleiman the Magnificent* 1520-1566 Roger Merriman 2013-04-16 This early work on Suleiman the Magnificent is both expensive and hard to find in its first edition. It details the life of a sixteenth century Sultan and is a fascinating work thoroughly recommended anyone interested in the history of the Ottoman Empire. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

*The Sun Also Rises* Ernest Hemingway 1926 Riis Bjarne Riis 2012 In 1996 Danish cycling legend Bjarne Riis won the Tour de France. 11 years later he called a press conference and confessed to taking performance-enhancing drugs in order to achieve the ultimate cycling triumph. In Riis, his sensational autobiography, the notoriously private Dane bears his soul. From the shy young daydreamer who discovered cycling as an eight year old, to the hardened, regular user of banned blood booster EPO. Brutally honest and as fast paced as one of his breakaways from the peloton, Riis is a powerful insight into a key figure in cycling.

The Decree of Sais Anne-Sophie von Bomhard 2012 von Bomhard presents an edition of the stela found during underwater excavations in the Abukir Bay, at the site of ancient Thonis-Heracleion, and inscribed with the Decree of Sais. The text is a parallel to that inscribed on another stela found at Naucratis at the turn of last century. The author gives an introduction to the discovery of the two stelae, as well as a description of the monuments, including the scenes and captions found in the lunette (Part II). von Bomhard goes on to discuss the arrangement of the texts and figures depicted on the decree, and the possible symbolism behind them. The bulk of the text is occupied by a careful transliteration and translation of the text, followed by an exhaustive bibliography, an index of words discussed, a synoptic overview of orthographic and figurative variations, and an index of Egyptian words. This is an important work that contributes to the understanding of royal benefactions to temples and aspects of trade and taxation systems in force at the time of the decree.
