Reading in a Second Language-Xi Chen 2015-11-19 Reading in a Second Language offers a comprehensive survey of the phenomenon and process of reading in a second language, with graduate and upper-level undergraduate students in second language acquisition, psycholinguistics, and applied psychology as its primary audience. The book explores reading processes from a number of complementary standpoints, integrating perspectives from fields such as first and second language reading, second language acquisition, linguistics, psycholinguistics, and cognitive neuroscience. The first half examines major factors in second language reading: types of scripts, the cognitive and neural substrates of reading; metalinguistic awareness, word recognition, language transfer, and lexical knowledge. The second part of the book discusses the social and educational contexts in which reading development occurs, including issues related to pedagogy, the use of technology in the classroom, reading disorders, and policy making. Reading in a Second Language provides students with a full, logically organized overview of the primary factors that shape reading development and processes in a second language.

Teaching Vocabulary to English Language Learners-Michael F. Graves 2012-11-15 Building on Michael Graves's bestseller, The Vocabulary Book, this new resource offers a comprehensive plan for vocabulary instruction that K-12 teachers can use with English language learners. It is broad enough to include instruction for students who are just beginning to build their English vocabularies, as well as for students whose English vocabularies are approaching those of native speakers. The authors describe a four-pronged program that follows these key components: providing rich and varied language experiences; teaching individual words; teaching word learning strategies; and fostering word consciousness. This user-friendly book integrates up-to-date research on best practices into each chapter and includes vignettes, classroom activities, sample lessons, a list of children's literature, and more.

Cultural Awareness and Competency Development in Higher Education-Leavitt, Lynda 2017-02-08 As the world becomes more globalized, student populations in university settings will continue to grow in diversity. To ensure students develop the cultural competence to adapt to new environments, universities and colleges must develop policies and programs to aid in the progression of cultural acceptance and understanding. Cultural Awareness and Competency Development in Higher Education is an essential reference book on the latest literature regarding multiculturalism in colleges and universities, focusing on administration and faculty implementation of culturally-aware curriculum to support the development of students' global competence. Featuring extensive coverage on a range of topics including social constructivism, co-curricular learning, and inclusive pedagogy, this publication is ideally designed for academicians, researchers, and students seeking current research on the inclusion of culturally diverse curriculums in higher education.

Bringing Literacy to Life-Heide Spruck Wrigley 1992 The result of a 2-year research study funded under the National English Literacy Demonstration Program for Adults of Limited English Proficiency, this handbook on adult English-as-a-Second-Language (ESL) literacy education represents a synthesis of ideas derived from various sources. It is meant as a resource for teachers who have some experience in teaching but are new to ESL literacy. It contains the following nine chapters: (1) "Adult ESL Literacy: State of the Art," which discusses some of the special features of adult ESL literacy; (2) "Approaches and Materials," which maintains that meaning-based approaches show the greatest promise in helping adults develop full literacy; (3) "Teaching Adult ESL Literacy in the Multilevel Classroom," which shows that group work is the most effective strategy for dealing with multilevel classrooms; (4) "Using Computer and Video Technology in Adult ESL Literacy," which discusses the pros and cons of using technology in ESL literacy teaching; (5) "Native Language Literacy," which demonstrates that using the native language of the learners is a viable approach to introducing literacy to adults who are not literate in their first language; (6) "Learner Assessment," which shows that program-based assessments are superior to standardized tests; (7) "Curriculum," which demonstrates that curriculum decisions are value decisions that mirror a program's philosophy; (8) "Staff Development and Program Issues," which holds that effective staff development should focus on the social context, adult learning, second language acquisition, literacy development, and effective teaching processes; and (9) "Curriculum Modules," which presents 10 teaching units that demonstrate meaning-based teaching. The NNEST Lens-Ahmar Mahboob 2010-02-19 The NNEST Lens invites you to imagine how the field of TESOL and applied linguistics can develop if we use the multilingual, multicultural, and multinational perspectives of a NNEST (Non Native English Speakers in TESOL) lens to re-examine our assumptions, practices, and theories in the field. The NNEST lens as described in and developed through this volume is a lens of multilingualism, multinationalism, and multiculturalism through which NNESTs and NESTs—as classroom practitioners, researchers, and teacher educators—take diversity as a starting point in their understanding and practice of their profession. The 16 original contributions to this volume include chapters that question theoretical frameworks and research approaches used in studies in applied linguistics and TESOL, as well as chapters that share strategies and approaches to classroom teaching, teacher education, and education management and policy. As such, this volume will be of interest to a wide range of students, practitioners, researchers, and academics in the fields of education and linguistics.

English Language Teaching Research in the Middle East and North Africa-Sahbi Hidri 2018-11-23 This edited collection examines a range of English Language Teaching (ELT) research in the Middle East and North Africa (MENA). While the MENA context has witnessed considerable change in recent years, it has so far been under-represented in ELT research at both the regional and the international level. This book aims to fill that gap by surveying the current state of the field, examining in detail a range of issues and concepts, and suggesting future directions for further research. It will be of interest to ELT researchers and practitioners in general - not just those based in MENA contexts themselves.

Genre and Graduate-level Research Writing-An Cheng 2018-03-20 In the context of the well-known pedagogical materials for graduate-level writers by Swales & Feak, An Cheng has written a resource that provides support for instructors who have the daunting task of scaffolding graduate writers' efforts to navigate discipline-specific research genres--genres that may be unfamiliar to instructors themselves. Genre and Graduate-Level Research Writing is grounded in genre-based theory and full of best practices examples. The book opens by presenting the case for the use of genre in graduate-level research writing and by examining rhetorical consciousness-raising and its ties to genre. Unique to the volume is a thorough analysis of the materials designed to teach genre and research writing--focused on the textbooks of Swales & Feak (e.g., Academic Writing for Graduate Students) and similar texts. Other chapters provide examples of discovery-based genre tasks, evaluative methods for assessing discipline-specific writing, and techniques for becoming a more confident instructor of graduate-level research writing.

Literacy, Language and Learning: The Nature and Consequences of Reading and Writing-David R. Olson 1985-04-26 Literacy is an important concern of contemporary societies. This book offers a comprehensive survey of recent efforts to understand the nature of written language and its role in cognition and in social and intellectual life. The authors represent a wide range of disciplines - cognitive psychology, linguistics, anthropology, sociology, education, history and philosophy - and address a wide range of questions. Is literacy a decisive factor in historical and cultural change? Does it alter the mental and social lives of individuals? If so how and via what mechanisms? Does learning to read and write change children's speech, thought or orientation to language? What are children and adults learning when they acquire literate skills? Are there differences - linguistic, psychological and functional - between speaking and writing? And are there differences between oral and written languages?

Handbook of Mobile Learning-Zane L. Berge 2013-06-19 Winner of the AECT Division of Distance Learning (DDL) Distance Education Book Award! This handbook provides a comprehensive compendium of research in all aspects of mobile learning, one of the most significant ongoing global developments in the entire field of education. Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets, and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.

Digital Literacies-Nicola Hockly 2014-06-03 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st-century skills, but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides: A theoretical framework through which to categorise and prioritise digital literacies Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice A consideration of exactly how to integrate digital literacies into the English language syllabus Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks), and how to access teacher development opportunities online This book is ideal for English language teachers and learners of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework.

Teaching Academic ESL Writing-Eli Hinkel 2003-10-17 Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student-writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing, they must have the foundations of language in place--the language tools (grammar and vocabulary) they need to build a text. This text offers a compendium of techniques for teaching writing, grammar, and lexis to second-language learners that will help teachers effectively target specific problem areas of students' writing.

Based on the findings of current research, including a large-scale study of close to 1,500 non-native speakers' essays, this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students' writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners' language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second-language teachers of writing and second-language writers. Parts II and III include the key elements of classroom teaching: what to teach and why, possible ways to teach the material in the classroom, common errors found in student prose and ways to teach students to avoid them, teaching activities and suggestions, and questions for discussion in a teacher-training course. Appendices to chapters provide supplementary word and phrase lists, collocations, sentence chunks, and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post-secondary EAP students and as a professional resource for teachers of students in EAP courses.
