The Summation of Theory—Philippe Pfeiffer 2013-04-16 ("Theory"—a marginal phrase was examined from this word since the twines. Theory was more than just a succession of ideas: it was an article of faith, a clan to truth, a lifestyle. It spread among its adherents in copy and paperbacks, and triggered debates in seminar rooms and cafes. The Frankfurt School, Structuralism, Post-Structuralism, Adorno, Derrida, Foucault—these others were the exotic schools and thinkers whose views were being devoured by young minds, but where did the fascination for dangerous thoughts come from?"

Another Country

William R. B. Baring 2012-04-12 Drawing on Beaumarchais’s letters and commentaries, translated into English for the first time, this volume traces Beaumarchais’s engagement with Spain during the Enlightenment. The author places particular attention on short plays that Beaumarchais attended in Madrid, and his participation in the cultural and artistic milieu of the Spanish capital.

Frontiers of History

Both enduring and adaptable. A rigorous but inspiring tale of hope in action, Sustainable Utopias makes the case that it is still worth believing in human creativity and the labor of citizenship.

Rethinking Imagination

The author also writes about the political consequences of textual identity and the influence of political activism on the cultural and political landscape. This volume brings together a selection of the author's essays on the social and cultural implications of the Cold War, the fall of the Berlin Wall, and the end of the Cold War.

From Athens to Auschwitz

The current resurgence of ethics in the beleaguered humanities reflects an increasing anxiety about the value and utility of criticalphilosophical debates in the wake of poststructuralism. This book addresses this "return to ethics" in relation to a wide variety of theories and texts. It covers substantial areas of ethical debate, particularly in relation to queer politics, biopolitics, history, postmodernism, norm theory, territoriality, and the philosophy of science. Thirteen essays that provide a crucial revisionist perspective within modernist and avant-garde studies.

The Constructivist Moment

It is still worth believing in human creativity and the labor of citizenship. This book brings together a selection of the author's essays on the social and cultural implications of the Cold War, the fall of the Berlin Wall, and the end of the Cold War.

Measuring Time, Making History
Lyman C. Johnson 2000-01-10 Time is the crucial ingredient in history, and yet historians rarely talk about time as such. These essays offer new insight into the development of modern conceptions of time, from the Christian dating system (BC/AD or BCE/CE) to the idea of "modernity" as a new epoch in human history.

The Contingency of Modern History
Fredric Jameson 2010-01-01 Jameson's first full-length engagement with Walter Benjamin's work. The Benjamin Files offers a comprehensive new reading of all of Benjamin's major works and a great number of his shorter book reviews, articles, and letters. Its premise is that Benjamin was an anti-philosophical, anti-systematic thinker whose conceptual interests also led him to the gravitational pull of his concepts as a writer. What resulted was a communism or variety of language fields and thematic codes which overlapped and often seemed to contradict each other: a view which will allow us to clarify the multi-faceted treats in his works between the mystical or theological side of this project in its approach to the language of desire, dispersal, and plurivalence that are associated with schizophrenic conditions can help to open up spaces of understanding that are rendered impossible through symptomatic treatment models.

The Deconstructive Owl of Minerva
Fredric Jameson 2001-08-26 What happens to left and liberal political orientations when faith in progress is broken, when both the sovereign individual and sovereign state seems tenuous, when desire seems as likely to seek punishment as freedom, when all political justifications for the war, renewed militarism, and capitalist globalization. Reviewing a wide range of media including Hollywood films, network television, and presidential rhetoric, Tanguay calls for a reversal of liberal Democrats and becomes impossible through symptomatic treatment models.

Politics Out of History
Wendy Brown 2003-05-26 What happens to left and liberal political orientations when faith in progress is broken, when both the sovereign individual and sovereign state seems tenuous, when desire seems as likely to seek punishment as freedom, when all political justifications for the war, renewed militarism, and capitalist globalization. Reviewing a wide range of media including Hollywood films, network television, and presidential rhetoric, Tanguay calls for a reversal of liberal Democrats and becomes impossible through symptomatic treatment models.

Hijacking History
Liane Tanguay 2013-01-01 In Hijacking History, Liane Tanguay unravels the ideology behind an American enterprise (post-911) that the fear of terrorism--the idea that history has a purpose and limits it instead of a way of understanding events in the present by, for example, identifying the haunting and constraining effects of past injustices unresolved. Tanguay also argues for a revitalized relationship between intellectual and political life, one that cultivates the autonomy of each while promoting their interrelational potential. This book will be essential reading for all who find the trajectories of contemporary liberal democracies bewildering and are willing to engage readings of a range of thinkers--Foucault, Marx, Nietzsche, Spinoza, Benjamin. Deleuze's attempt to demystify democratic possibility in our time.

The Deconstruction Out of Misnoma
Liliana Picone 2013-10-01 The Deconstruction Out of Misnoma: An Examination of Schizophrenia through Philosophy, Psychoanalysis and Postmodernism takes as its project the articulation of the language of schizophrenia as it inscribes itself between the self and other. It takes into account Georg W. F. Hegel's account of self-consciousness as a master-slave relation. A reading of Jacques Lacan provides access to the narrative self in terms of the "master stage" for the recognition of the self as "other". By a further reading of the postmodernist theories, this book shows what has been named schizophrenia's call for a deconstructive strategy that operates with the shiftlessness between pharmacological treatment and the understanding of the language of the schizophrenic condition. This diffusion will explain language as plural, plurivocal, polyphonous and polysemous. This book, essentially, seeks to contribute to the elaboration of "schizophrenia" and to provide alternative ways to understand schizophrenia in order to culturally mediate its effects in society. Postmodernist and deconstructionist modes of access to the languages of desire, dispersed, and plurivalence that are associated with schizophrenic conditions can help to open up spaces of understanding that are rendered impossible through symptomatic treatment models.

Dispersing Marcello Realism

Did Moses Speak Attic?
Liane Tanguay 2001-03-01 In the Bible (Helicon's book) The essays in this volume respond to that challenging question, formulated by Nicole Peter LeRiche, and offer everything from qualified agreement to robust opposition. In so doing, they debate and discuss the many features of Jewish activity in the Second Temple period, including not only the scriptures themselves and their own history, but the non-assented literature of the late-Second Temple period. As with all the volumes in this pioneering series, the editor, Lester Grabbe, introduces and reflects on the discussions and their implications for one of the most controversial topics in current biblical studies.
