Widespread Idioms in Europe and Beyond Elisabeth Piirainen 2012 This groundbreaking book in theoretical and empirical phraseology research looks at Europe's linguistic situation as a whole, including 74 European and 17 non-European languages. The occurrence of idioms that actually share the same lexical and semantic structure across a large number of languages has never been demonstrated so clearly before. It is a Widespread Idioms in Europe and Beyond. This book answers significant questions regarding hitherto vague ideas about the phraseological similarities between European languages and their cultural foundation, ranging from intertextuality, aspects of European mental, material, and social culture, to culturally based perceptual phenomena. This inventory, which analyzes 190 out of a total of 380 widespread idioms and includes maps, is valuable for academic teaching and further research in the fields of phraseology and figurative language, areal and contact linguistics, and European cultural studies.

Recent Advances in Natural Language Processing Ruslan Mitkov 1997-01-01 This volume is based on contributions from the First International Conference on Recent Advances in Natural Language Processing (RANLP'95) held in Tzgov Chark, Bulgaria, 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing (NLP) for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP'95, the best (revised) papers have been selected for this book, in the hope that they reflect the most significant and promising trends (and latest successful results) in NLP. The book is organised thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way, the authors have prepared an extensive index which analyzes 190 out of a total of 380 widespread idioms and includes maps.

Why Am I So Brown? Trinidad Sanchez 1991 Poetry. "WHY AM I SO BROWN? is a compelling scenario of ideals and cultural activism. Trinidad's signature poem 'Let Us Stop This Madness' sets the tone for a plurality of global political justice. Through an integration of barrio rhythm and street orality, he finds identity and culture. His sensitive and mature hand captures a consciousness that is a framework for aesthetic realism and change. In this, Trinidad's fifth book, his sense of humanity has gelled into completeness. This is a must read for anyone who will take the challenge to investigate this form we call poetry"-Ron Allen, Horizons in Poetry, Detroit, Michigan.

Researching International Pedagogies Meeri Hellstén 2008-10-13 In our rapidly globalizing world students are able to access learning through mobility, through computer mediated experiences, and through the diverse perspectives of their peers and teachers. All of these components impact on the ways in which universities and their staff prepare and present courses for their students. This book presents an edited selection of chapters compiled under the theme of 'new international pedagogies'. The objective is to document current pedagogical frameworks and practices in the teaching and learning context of international education. It showcases innovative teaching and learning methods, methodological frameworks and novel pedagogies that contribute to improving the effectiveness of teaching and learning in international settings and diverse student groups. The collection of seventeen chapters offers new debate on applied critical educational thought, innovation in teaching and learning, and culturally sensitive and inclusive curriculum practices across a broad disciplinary spectrum. Of central interest is the production of teaching and learning examples that provide evidence for implementing progress and advancement in the field. The book aims to stimulate further debate, research and application in the field of international pedagogies.

Educating Humanity Lars Lovie 2003-06-02 During the past decade there has been renewed interest in the German idea of Bildung. This collection of newly written
state-of-the-art reviews of both established themes and new directions, authored and edited by experts in the field. The handbook is divided into three sections and reflects the engaging diversity of language awareness perspectives on language teaching and teachers, language learning and learners, and extending to additional areas of importance that are less directly concerned with language instruction. In their introductory chapter, the editors provide valuable background to the language awareness field along with their summary of the chapters and issues covered. A helpful section giving further reading suggestions for each of the chapters is included at the end of the book. This volume is essential reading for graduate students and researchers working in the sphere of language awareness within applied linguistics, sociolinguistics and across the wider spectrum of language and communication.

**Columbine & Beyond**

David Barton 2013-04-17 In Language Online, David Barton and Carmen Lee investigate the impact of the online world on the study of language. The effects of language use in the digital world can be seen in every aspect of language study, and new ways of researching the field are needed. In this book the authors look at language online from a variety of perspectives, providing a solid theoretical grounding, an outline of key concepts, and practical guidance on doing research. Chapters cover topical issues including the relation between online language and multilingualism, identity, education and multimodality, then conclude by looking at how to carry out research into online language use. Throughout the book many examples are given, from a variety of digital platforms, and a number of different languages, including Chinese and English. Written in a clear and accessible style, this is a vital read for anyone new to studying online language and an essential textbook for undergraduates and postgraduates working in the areas of new media, literacy and multimodality within language and linguistics courses.

Žižek's Jokes Slavoj Žižek 2018-02-23 Žižek as comedian: jokes in the service of philosophy. "A serious and good philosophical work could be written consisting entirely of jokes."—Ludwig Wittgenstein The good news is that this book offers an entertaining but enlightening compilation of Žižekisms. Unlike any other book by Slavoj Žižek, this compact arrangement of jokes culled from his writings provides an index to certain philosophical, political, and sexual themes that preoccupy him. Žižek’s Jokes contains the set-ups and punch lines—as well as the offenses and insults—of Žižek is famous for, all in less than 200 pages. So, what’s the bad news? There is no bad news. There’s just that imitable Slavoj Žižek, disguised as an impossibly erudite, politically incorrect uncle, beginning a sentence, “There is an old Jewish joke, loved by Derrida...” For Žižek, jokes are amusing stories that offer a shortcut to philosophical insight. He illustrates the logic of the Hegelian triad, for example, with three variations of the “Not tonight, dear, I have a headache” classic: first the wife claims a migraine; then the husband does; then the wife exclaims, “Darling, I have a terrible migraine, so let’s have some sex to refresh me!” A punch line about a beer bottle provides a Lacanian lesson about one signifier. And a “truly obscene” version of the famous “aristocrats” joke has the family offering a short course in Hegelian thought rather than a display of unspeakables. Žižek’s Jokes contains every joke cited, paraphrased, or narrated in Žižek’s work in English (including some in unpublished manuscripts), including different versions of the same joke that make different points in different contexts. The larger point being that comedy is central to Žižek’s seriousness.

**The Palgrave Handbook of Positive Education** Margaret L. Kern 2021 “The approaches outlined in this volume will help expand the narrow focus on academic success to include psychological well-being for students and educators alike. It is a must-read for anyone interested in how positive outcomes such as life satisfaction, positive emotion, and meaning and purpose can be optimized in the educational settings.”—Robert Moskowitz, PhD, MPH, Northwestern University Feinberg School of Medicine, USA, IPPA President 2019-2021 This open access handbook provides a comprehensive overview of the growing field of positive education, featuring a broad range of theoretical, applied, and practice-focused chapters from leading international experts. It demonstrates how positive education offers an approach to understanding learning that blends academic study with life skills such as self-awareness, emotion regulation, healthy mindsets, mindfulness, and positive habits, grounded in the science of well-being, to promote character development, optimal functioning, engagement in learning, and resilience. The handbook offers an in-depth understanding and critical consideration of the relevance of positive psychology and education, challenging the existing foundations of the empirical findings, and the existing educational applications and interventions. The contributors situate well-being science within the broader framework of education, considering its implications for teacher training, education and developmental psychology, school administration, policy making, pedagogy, and curriculum studies. This landmark collection will appeal to researchers and practitioners working in positive psychology, educational and school psychology, developmental psychology, education, counselling, social work, and public policy.

Co-Creation in Higher Education 2019-01-28 The main purpose of this book is to disseminate new research on co-creative approaches to teaching and learning in Higher Education (HE). The cases presented draw from a Danish cultural and educational context and have a special focus on collaborative, co-creative and distributed perspectives. With this collected volume, we wish to show the diversity of approaches to the concept of co-creation, on the one hand and, on the other, we intend to give a specific direction to these studies, which is humanistic, sociological, creative and pedagogical.

**Tales of Literacy for the 21st Century** Maryanne Wolf 2016-07-21 The Literary
Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of ‘the literary’ has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought. It is sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into the meaning and value of literary reading. Being Literate in the 21st Century wrestles with critical, timely questions for 21st-century society. How does literacy as a human brain? What does it mean to be a literate or a non-literate person in the present digital culture: for example, what will be lost in the present reading brain, and what will be gained with different mediums than print? What are the consequences of a digital reading brain for the literary mind and for writing itself? Can knowledge about the reading brain and advances in technology offer new forms of literacy and new forms of knowledge to the peoples in remote regions of the world who would never otherwise become literate? By using both research from cognitive neuroscience, psycholinguistics, child development, and education, and considering literary examples from world literature, Maryanne Wolf plots a course that seeks to preserve the deepest forms of reading from the past, while developing the cognitive skills necessary for this century’s next generation.

Enduring Military Boredom  
B. Maeland  
2009-08-13  
It is often said that war is 5% horror and 95% boredom. In this sense, military boredom is historically enduring as well as personally enduring for the soldiers who have to endure it. This book contributes to a deeper understanding — historically, empirically and theoretically — of the complex phenomenon of boredom in a military context.

Language Assessment Literacy  
Dina Tsagari  
2020-04-21  
The field of language testing and assessment has recognized the importance and underlying theoretical and practical underpinnings of language assessment literacy (LAL), an area that is gradually coming to prominence. This book addresses issues that promote the concept of LAL for language research, teaching, and learning, covering a range of topics. It brings together 14 chapters based on high-stakes and classroom-based studies authored by academics, professionals and researchers in the field. The text examines diverse issues through a multifaceted approach, presenting high-quality contributions that fill a gap in a research area that has long been neglected. It is a valuable addition to the field of language assessment literacy.
language teaching and learning. In Part One, emphasis is placed on challenges that second language education has to face, both those more general, dealing with language policy issues, and those more specific, concerned with instructional options in the language classroom. Part Two focuses on challenges involved in researching the processes of teaching and learning in the second and foreign languages classroom, both with respect to research methodology and efforts to tap some variables impinging upon the effects of instruction. Finally, Part Three is devoted to challenges involved in second and foreign language teacher education, the quality of which to a large extent determines the outcomes of second language education in any educational context.

The Powers of Literacy (RLE Edu I) Bill Cope 2014-06-17 Literacy remains a contentious and polarized educational, media and political issue. What has emerged from the continuing debate is a recognition that literacy in education is allied closely with matters of language and culture, ideology and discourse, knowledge and power. Drawing perspectives variously from critical social theory and cultural studies, poststructuralism and feminisms, sociolinguistics and the ethnography of communication, social history and comparative education, the contributors begin a critical interrogation of taken-for-granted assumptions which have guided educational policy, research and practice.

Norges Historie Bok Leif Wilhelmsen 2019-11-21 Dette er en svært oppsiktsvekkende Historie bok om Norge som tar fra Oldtid og frem til vår tid. Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the transformation of long and syntactically complex sentences into shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently used in simplification, describes full systems designed for specific languages and target audiences, and offers available resources for research and development together with text simplification evaluation techniques.
