The science of judgment and decision making involves three interrelated forms of research: analysis of the decisions people face, description of their natural responses, and interventions meant to help them do better. After briefly introducing the field's intellectual foundations, we review recent basic research into the three core elements of decision making: judgment, or ...

**The Psychology of First Impressions - Six Degrees**
Jan 18, 2018 · And if the judgment made is a negative one, the difficulty in shifting someone’s opinion is extremely high. In many ways, the snap judgment of first impressions is related to the halo effect – where the perception of positive qualities in one thing or part gives rise to the perception of similar qualities in related things or in the whole.

**Piaget's Theory of Moral Development | Simply Psychology**
Moral development refers to the process through which children develop the standards of right and wrong within their society, based on social and cultural norms, and laws. Lawrence Kohlberg describes moral development as a process of discovering universal moral principles, and is based on a child's intellectual development. Piaget conceptualizes moral development as a ...
