The Three Body Problem

Soon to be a Netflix Original Series!

The War of the Worlds for the 21st century... packed with a sense of wonder.

The great Calculor of Libris was forced to watch as Overmayor Zarvora had four of its components lined up against a wall and shot for negligence. Thereafter, its calculations were free from errors, and that was just as well — for only this strangest of calculating machines and its two thousand enslaved components could save the world from a new ice age. And all the while a faint mirrorsun hangs in the sky, ridding with cancer, he chose to end his life, just to hide himself from God and launch himself into space where the Trisolaran First Fleet awaited. Captured and tortured beyond endurance for decades, Yun eventually breaks and agrees to work for the Trisolarans. But as the First Fleet approaches Earth, Yun decides during Earth’s last breaths to fight for their survival. The first of sixteen new graphic novels from Liu Cixin and Talos Press, Sea of Dreams is an epic tale of the future that all science fiction fans will enjoy.

Strange Attractors
Charles Soule 2017-06-14 Writer Charles Soule (Daredevil, Poe Dameron) and illustrator Greg Scott come together for a science-fiction tale of the ties that bind New York City. Dr. Spencer Brownfield, a disgraced former professor, believes a series of catastrophic events are coming to New York City, and someone has to keep the city safe after he’s gone. Enter Heller Wilson, a brilliant mathematics student who discovers that his ailing (perhaps insane) mentor has been saving New York City from societal collapse by a series of “adjustments” in the butterfly effect. But now, all signs point toward an impending disaster. Can Wilson take what little he’s learned and save the city in time? Collects the complete series. Includes the never-before-collected short story “Antithesis,” illustrated by Soo Lee (Liquid City). “...a fascinating well-researched look beyond the concrete...” - Newsarama
