where instructors will find a test bank containing multiple choice, true and false, short answer, and essay questions and answers for each chapter, and a complete set of tables and figures from the text; and students will find chapter outlines, flashcards of key terms, and links to further resources and the authors' Facebook page. Intended as a text for courses on cross-cultural psychology, multicultural psychology, cultural psychology, cultural diversity, and the psychology of ethnic groups and a resource for practitioners, researchers, and educators who work in multicultural environments.

Social Psychology David E. Rokah 2021-05-19 Written by a team of sociologists, this text introduces readers to social psychology, focusing on the contributions of sociology to the field of social psychology. The authors believe sociology provides a unique and indispensable vision of the social-psychological world in the theoretical perspectives that sociologists employ when studying human interactions and in the methodological techniques they utilize. Within the pedagogically rich chapters, topics are examined from the perspectives of symbolic interactionism, social structure and personality, and group processes.

Research Methods in Psychology John J. Schaghtey 2009 Research Methods in Psychology provides a comprehensive and readable introduction to methods for undergraduates. Employing a multi-method approach and exposing students to real examples of published research throughout the text, the authors provide students with the tools necessary to do good and ethical research in psychology and to understand the research they learn about in psychology courses and in the media. A wealth of pedagogical aids serve to break down the aversion and phobia that many students bring to a methods course. The 8th edition boasts a wealth of new examples with nearly 50 of the research examples from 2004-2007 and more than half of those from 2006 and 2007. So, as students read this methods text, they will also be learning about cutting-edge research in psychology.

Introduction to Political Psychology Martha L. Cottam 2004-04-26 The first comprehensive textbook on political psychology, this user-friendly volume explores the psychological origins of political behavior. Using psychological concepts to explain types of political behavior, the authors introduce a broad range of theories and cases of political activity to illustrate the behavior. The book examines many patterns of political behaviors including leadership, group behavior, voting, race, ethnicity, nationalism, political extremism, terrorism, war, and genocide. Test boxes highlight current and historical events to help students see the connection between the world around them and the concepts they are learning. Examples highlight a variety of research methodologies used in the discipline such as experimentation and content analysis. The "Political Being" is used throughout to remind the reader of the psychological theories and concepts to be explored in each chapter. Introduction to Political Psychology explores some of the most horrific things people do to one another for political purposes, as well as how to prevent and resolve conflict, and how to recover from it. The goal is to help the reader understand the enormous complexity of human behavior and the significant role political psychology can play in improving the human condition. Designed for upper division courses on political psychology or political behavior, this volume also contains material of interest to those in the policymaking community.

Covering all the major topics and theoretical perspectives, this exciting new book provides straightforward explanation of key terms and concepts in a lively and student-friendly manner. Debates and controversies are brought to life and the wider practical relevance of the subject is emphasised throughout. Pedagogical features that appear across the book include Research Classic sections which describe classic studies, Research Applications boxes that highlight more comprehensive and readable introduction to methods for undergraduates. Using a multi-method approach and exposing students to real examples of published research throughout the text, the authors provide students with the tools necessary to do good and ethical research in psychology and to understand the research they learn about in psychology courses and in the media. A wealth of pedagogical aids serve to break down the aversion and phobia that many students bring to a methods course. The 8th edition boasts a wealth of new examples with nearly 50 of the research examples from 2004-2007 and more than half of those from 2006 and 2007. So, as students read this methods text, they will also be learning about cutting-edge research in psychology.

Evolutionary Psychology: The New Science of the Mind, 4/E provides students with the conceptual tools of evolutionary psychology, and applies them to empirical data through the lens of modern evolutionary psychology. Evolutionary Psychology: The Ne w Science of the Mind, 5/e provides students with the conceptual tools of evolutionary psychology, and applies them to empirical research on the human mind. Content topics are logically arrayed, starting with challenges of survival, mating, parenting, and kinship; and then progressing to challenges of group living, including cooperation, aggression, sexual conflict, and status, prestige, and social hierarchies. Students gain a deep understanding of applying evolutionary psychology to their own lives and all the people they interact with.

Introduction to Industrial/Organizational Psychology Ronald E. Riggio 2003 For courses in Industrial/Organizational Psychology and Psychology of Work Behavior. This compelling, comprehensive, student-oriented introduction to industrial/organizational psychology emphasizes the connections between theory and practice across the full spectrum of personnel issues, worker issues, work group and organizational issues, and work environment issues. Its focus on career information, employee-centered issues, and cutting-edge research ensures that students get and stay motivated--right from the beginning. Educational Research by Glen O. Gabbard 2014-05-05 The definitive treatment textbook in psychiatry, this fifth edition of Gabbard's Treatments of Psychiatric Disorders has been thoroughly restructured to reflect the new DSM-5® categories, preserving its value as a state-of-the-art resource and increasing its utility in the field. The editors have produced a volume that is both comprehensive and concise, meeting the needs of clinicians who prefer a single, user-friendly volume. In the service of brevity, the book focuses on treatment over diagnostic considerations, and addresses both empirically-validated treatments and accumulated clinical wisdom where research is lacking. Noteworthy features include the following: Content is organized according to DSM-5® categories to make rapid retrieval of relevant treatment information for the busy clinician. Outcome studies and expert opinion are presented in an accessible way to help the clinician know what treatment to use for which disorder, and how to tailor the treatment to the patient. Content is restricted to the major psychiatric conditions seen in clinical practice while leaving out less common conditions and those that have limited outcome research related to the disorder, resulting in a more streamlined and affordable text. Chapters are meticulously referenced and include dozens of tables, figures, and other illustrative features that enhance comprehension and recall.

Evolutionary Psychology: The New Science of the Mind, 4/E provides students with the conceptual tools of evolutionary psychology, and applies them to empirical research on the human mind. Content topics are logically arrayed, starting with challenges of survival, mating, parenting, and kinship; and then progressing to challenges of group living, including cooperation, aggression, sexual conflict, and status, prestige, and social hierarchies. Students gain a deep understanding of applying evolutionary psychology to their own lives and all the people they interact with.
